COGNEX

THE GLOBAL LEADER

IN MACHINE VISION AND INDUSTRIAL BARCODE READING

Cognex®, the world's most trusted machine vision and industrial barcode reading company.

With over 1.5 million systems installed in facilities around the world and over thirty six years of experience, Cognex is solely focused on industrial machine vision and image-based barcode reading technology. Deployed by the world's top manufacturers, suppliers and machine builders, Cognex products ensure that manufactured items meet the stringent quality requirements of each industry.

Cognex solutions help customers improve manufacturing quality and performance by eliminating defects, verifying assembly and tracking information at every stage of the production process. Smarter automation using Cognex vision and barcode reading systems means fewer production errors, which equates to lower manufacturing costs and higher customer satisfaction. With the widest range of solutions and largest network of global vision experts, Cognex is the best choice to help you **Build Your Vision.™**

COGNEX BARCODE READERS ANY CODE, **EVERY TIME**

Nearly every product uses a 1-D or 2-D barcode to automate and simplify identification and data capture. The basic process in reading codes is to 1) illuminate the code, 2) locate the code, and 3) extract the data. Organizations must be able to read codes quickly and accurately for maximum efficiency and throughput.

Cognex image-based barcode readers decode 1-D and 2-D codes, from printed labels to the hardest to read direct part mark (DPM) codes, and deliver industry-leading read rates. Advanced technology, modular options, and easy setup helps reduce costs, optimize performance, increase throughput, and control traceability.

INDUSTRIES

Cognex supplies solutions to virtually all manufacturing and logistics industry sectors, including:

- Aerospace
- Airport Baggage Handling
- Automotive
- Ecommerce Fulfillment
- Electronics
- Field Service
- Food and Beverage
- Medical Devices
- Pharmaceutical
- Retail Distribution

Fixed-Mount Barcode Readers

Handheld Barcode Readers

Mobile Solutions

PATENTED TECHNOLOGY FOR OPTIMAL PERFORMANCE AND TRACEABILITY

Cognex products are optimized with patented decoding algorithms and advanced technologies to ensure continuously high read rates for the most difficult and degraded 1-D and 2-D codes.

1DMax Advanced Algorithm

1DMax[®] is a 1-D barcode reading algorithm optimized for omnidirectional barcode reading and extreme variations in contrast, blur, damage, resolution, quiet zone violations, and perspective distortion.

Hotbars Image Analysis Technology

Grouped with 1DMax, Hotbars[®] locates and extracts 1-D barcodes up to 10x faster than a typical reader, even with increased noise, large specular reflection, reduced quiet zone, limited contrast, and damage.

	TYPICAL 1-D ALGORITHM	HOTBARS IMAGE ANALYSIS
Noise		
Specular		
Perspective		
Quiet Zone		
Contrast		
Damage		

2DMax Advanced Algorithm

2DMax[®] 2-D barcode reading algorithm provides reliable 2-D code reading despite code quality, printing method, or surface type.

PowerGrid

PowerGrid® quickly locates 2-D codes that exhibit significant damage to or complete elimination of a code's finder pattern, clocking pattern, or quiet zone.

No finder pattern

No finder or clocking pattern

Quiet zone violation

Stripe

1-D/2-D Auto-Discrimination Algorithm

1-D/2-D Auto-Discrimination reduces decode times for complex multi-code, multi-symbology label-based code applications.

High Dynamic Range (HDR) Technology

HDR imaging uses the latest CMOS image sensor technology, which is 16x more detailed than conventional sensors, to globally enhance image quality and contrast.

Target Source

Conventional Sensor

HDR+

HDR+ further increases localized contrast changes automatically. This creates a more uniformed image in a single acquisition allowing greater depth-of-field, faster line speeds, and improved handling of difficult codes.

HDR

HDR+

HDR+ technology enables reading an increased range of codes than is possible with conventional or other HDR technologies.

DATAMAN **FIXED-MOUNT** BARCODE READERS

DataMan® fixed-mount, image-based barcode readers offer advanced technology, processing power, modularity, and ease of use for challenging manufacturing and logistics applications.

DataMan 70 Series

Compact design ideal for reading 1-D and 2-D label-based codes in tight application spaces.

POWER	RESOLUTION	CONNECTIVITY

¹ Processing Power

The processing power of a reader is measured by how quickly it decodes a barcode and outputs the resulting data. A comparison test simulating a complex 1-D/2-D multi-code application (consisting of four varied 1-D codes and seven varied 2-D codes together) was used to determine the processing power of each DataMan fixed-mount barcode reader.

² ESD-Safe Housing

Protects devices and flammable environments from electrostatic discharge (ESD), the sudden flow of static electricity between two objects.

MODULAR DESIGN FOR MAXIMUM FLEXIBILITY

Cognex's commitment to continuous innovation ensures modular software and hardware configuration options to solve any barcode reading challenge. The example below represents the modular capabilities of Cognex fixed-mount, handheld, and mobile barcode readers.

Patented technology and advanced algorithms optimize performance.

Straight and right-angle configuration options

Manual, 3-position, S-mount, C- and CS-mount, and liquid lens (autofocus) options for maximum application coverage

Field-interchangeable multi-color and polarization lighting options for optimal illumination on all surface types

High-powered integrated and external lighting options available

RS-232, USB, Ethernet with industrial protocols, and other network connectivity options available

Liquid lens autofocus technology

Liquid lens autofocus technology is available for fixed-mount, handheld, and mobile barcode reader models to automatically adapt to changes in working distances for greater depth-of-field. Unlike traditional zoom lenses, liquid lenses do not have any moving parts that can wear out or fail, saving time and maintenance costs.

Greater coverage with fewer readers

The Xpand™ technology accessory is available to increase the field-of-view coverage of a single barcode reader by over 50%. This enables wider belt coverage using fewer readers, simplifying setup and installation, and reducing overall cost.

Single Reader

Single Reader + Xpand Accessory

Shorter required working distance

50% increased coverage

Performance feedback for process optimization

Cognex Real Time Monitoring (RTM) technology provides performance feedback for networked DataMan fixed-mount barcode readers, including no-read tracking, code quality metrics, heat mapping, and configuration audit trails. A light version of RTM (RTM Lean) is included within the DataMan Setup Tool.

EASY SETUP AND OPERATION

DataMan Setup Tool

The DataMan Setup Tool software simplifies installation and operation of Cognex barcode readers. Intelligent auto-tuning and application assistants guide the user to quickly optimize complex parameters with ease. The Setup Tool captures images and data in real time allowing users to review and track device result history as well as other parameters such as code quality.

Multiple read setups allow for greater product & environmental variation

DATAMAN BARCODE VERIFIERS

Barcode verification is the process of grading the quality of barcodes. Barcode verifiers capture images and generate reports to demonstrate compliance to parameters within industry standardization guidelines.

DataMan 8070 Series Verifier

Packed with powerful lighting options, robust grading algorithms, a high-speed processing engine, and a high-resolution camera to grade the most difficult DPM codes.

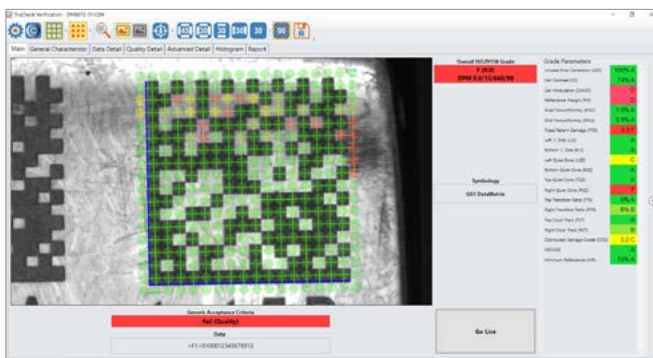

30, 45, and 90 degree lighting

Reliable and repeatable results

The DataMan Setup Tool calculates an overall grade based on several quality parameters. Detailed results show whether codes meet industry standards. Auto-generated reports can be used to demonstrate compliance, as well as help pinpoint printing and process control issues.

DATAMAN **HANDHELD** BARCODE READERS

DataMan handheld barcode readers provide best-in-class performance with patented Hotbars technology for 1-D barcodes and PowerGrid technology for 2-D codes.

DataMan 8050 Series

Provides high-speed performance for well-marked DPM and label-based codes in the harshest environments.

¹ UltraLight

UltraLight[®] technology uses polarized, low-angle, and diffuse lighting to provide the best image formation and illumination for the hardest-to-read DPM codes.

² ESD-Safe Housing

Protects devices and flammable environments from electrostatic discharge (ESD), the sudden flow of static electricity between two objects.

MOBILE SOLUTIONS

Cognex offers the only end-to-end family of mobile scanning solutions, achieving best-in-class 1-D, 2-D, and direct part mark (DPM) barcode reading performance.

MX-1502 and MX-1000 Series

Combines fast, image-based 1-D and 2-D barcode reading with iOS® and Android® mobile devices for standard, long, and extended range applications.

FEATURES

Cognex Mobile Barcode Software Development Kit (SDK)

The Cognex Mobile Barcode SDK is a comprehensive software tool for all facets of mobile barcode scanning. It enables tailoring and maintaining a single application for all mobile devices across an entire organization.

The SDK can be used with any supported device, including:

- MX-1000 and MX-1502 Series mobile terminals
- MX-100 Series mobile barcode readers
- Smartphone and tablet cameras (license required)

The modular design of Cognex mobile products supports a number of existing and future iOS and Android devices, leveraging the latest communication technologies including 3G, 4G, 4G LTE, Wi-Fi, Bluetooth, and more.

MODELS AND SYMBOLOGIES

Regardless of code symbology, size, quality, printing method, or surface, Cognex has a barcode reader that can read the code, ensuring maximum efficiency and traceability.

Model	Reads
L	1-D fixed position barcodes
QL	1-D omnidirectional barcodes
S	Slow or indexed well-marked 1-D and 2-D codes
Q	High-speed 1-D and 2-D codes
X	Challenging 1-D and 2-D codes, including DPM codes
UHD	Ultra-small, well-marked 2-D DPM codes (0.7 mil)
HD	Small 1-D and 2-D codes (6-10 mil)
HDX	Smaller 1-D and 2-D codes (2-5 mil)
DL	Well-marked 1-D and 2-D DPM codes
SR	Codes from standard range
LR	Dense or small codes from long range (high shelves)
ER	Codes from extended-range (very high shelves)

INDUSTRY 4.0

Industry 4.0, or “The Industrial Internet of Things,” refers to a set of emerging innovations in advanced automation, machine vision, Big Data, cloud computing, and machine learning which will revolutionize manufacturing. Industry 4.0 demonstrates tremendous potential to bolster productivity, reduce waste, refine product quality, enhance manufacturing flexibility, and decrease operating costs.

Machine vision and industrial barcode reading will be a critical part of automation systems in Industry 4.0. As data analytics capabilities progress, the high volume of data accessible through vision and barcode reading equipment will be used to identify and flag defective products, understand their deficiencies, and enable fast and effective intervention in the Industry 4.0 factory.

BUILD YOUR VISION

IMAGE-BASED BARCODE READERS

Cognex industrial barcode readers and mobile terminals with patented algorithms provide the highest read rates for 1-D, 2-D, and DPM codes regardless of the barcode symbology, size, quality, printing method, or surface.

- Reduce costs
- Increase throughput
- Control traceability

www.cognex.com/BarcodeReaders

2D VISION SYSTEMS

Cognex machine vision systems are unmatched in their ability to inspect, identify, and guide parts. They are easy to deploy and provide reliable, repeatable performance for the most challenging applications.

- Industrial grade with a library of advanced vision tools
- High speed image acquisition and processing
- Exceptional application and integration flexibility

www.cognex.com/machine-vision

3D LASER PROFILERS

Cognex In-Sight laser profilers and 3D vision systems provide ultimate ease of use, power, and flexibility to achieve reliable and accurate measurement results for the most challenging 3D applications.

- Factory calibrated sensors deliver fast scan rates
- Industry-leading vision software with powerful 2D and 3D tool sets
- Compact, IP65-rated design withstands harsh factory environments
