

Heavy duty steel reinforced edging strip.

Key features.

- This heavy duty steel edging strip offers extra protection and durability.
- Its flexible nature makes it ideal for fitting to irregular shapes
- Supplied in 50 metre lengths, available in 3 sizes to fit panel thicknesses: 1-2mm, 2-3mm, 4-5mm.
- PVC is an excellent material for use when chemical and UV resilience is required, It also has good physical characteristics including resistance to corrosion.
- Moulded steel spine re-enforcement is segmented for flexibility
- Simply push on and the internal lips will hold in place
- Very hard wearing and washable

Part number	Width A (mm)	For Panel Thickness (mm)	Pack quantity (m)
CSGS-1	10	4-5	50
CSGS-2	9	1-2	50
CSGS-3	9	1-3	50

Specification.

Material:
PVC & Steel

Colour:
Black

Shore:
A 80 D2240

PVC Specific Gravity:
1.31 D792

Steel Insert:
16mm x 0.3mm ST3 K60

Brittleness Temp:
30c D746

Temperature Range:
-20°C to +40°C

Bending Radius:
30mm none

Ozone Resistance:
No Cracks D1149

Manufacturing Tolerances:
DIN 16941 3B
