

## simplyCAN

### Active USB Adapter

#### 1 x CAN (High-Speed)

With its simplyCAN adapter HMS offers an easy and economical way to diagnose, configure and commission devices and systems on CAN. simplyCAN can be easily integrated into customer applications using a straightforward API and requires no driver installation for operation.

#### FEATURES AND BENEFITS

- Inexpensive and easy to install - no driver installation required
- Simple API interface for fast integration into customer applications
- Optimized for diagnosis and commissioning of devices and systems with CAN bus interface
- Galvanic isolation prevents over-voltage damage

#### EASY COMMISSIONING

simplyCAN behaves like a standard serial USB device when connected to a USB port, the installation of a special driver under Windows 10 or Linux is therefore not required. For accessing the CAN functions of the simplyCAN adapter only a small number of functions is required, allowing easy and fast integration into customer applications.

#### COMPARISON OF THE DIFFERENT USB-CAN INTERFACES

HMS offers under the Ixxat brand different USB interfaces for CAN. Besides a one or two channel version and the support of CAN FD and LIN, also an embedded variant for implementation into customer devices is offered. An overview and comparison of the available USB interfaces can be found on the following page:
