# Brush strip, super-airtight – DK 7825.375

created: 21.02.2019 build on [www.rittal.com/uk-en](http://www.rittal.com/uk-en)

## Product description

**Description:** For individual installation of enclosure panels, gland plates and panels. Cut-outs for cable routing at any position in the side panel, rear panel, doors, roof and base plate. These special brush strips may be used to create airtight entries for cable sections and conductors. The brush strips arranged in an offset configuration ensure good sealing from the routed cables even with large quantities of cables. In this way, unwanted flow losses may be reduced to a minimum.
