## Additional Resources

These documents contain additional information concerning related products from Rockwell Automation.

Resource	Description
Industrial Automation Wiring and Grounding Guidelines, publication <a href="#">1770-4.1</a>	Provides general guidelines for installing a Rockwell Automation industrial system.
Product Certifications website, <a href="http://www.rockwellautomation.com/global/certification/overview.page">http://www.rockwellautomation.com/global/certification/overview.page</a>	Provides declarations of conformity, certificates, and other certification details.

You can view or download publications at <http://www.rockwellautomation.com/global/literature-library/overview.page>. To order paper copies of technical documentation, contact your local Allen-Bradley distributor or Rockwell Automation sales representative.

Options	
Code	Description
D	24V DC fan control
A	90...250V AC fan control

## Specifications—Single-phase Devices

**Table 1 - Output Voltage**

Attribute	Description	
	230V AC	600V AC
Operational Voltage Range	24...240V AC, +10%, -15% on max.	42...660V AC, +10%, -15% on max.
Blocking Voltage	800Vp	1200Vp
Internal Varistor	275V	625V

**Table 2 - General Specifications**

Attribute	Description
Short Circuit Current Rating	100 kA (UL508)
Latching voltage (across L1-T1)	20V
Operational frequency range	45...65 Hz
Power factor	> 0.5 @ $V_{rated}$
Touch Protection	IP20
Control input status	continuously ON Green LED, when control input is applied
Pollution degree	2 (non-conductive pollution with possibilities of condensation)
Overvoltage category	III (fixed installations)
Isolation	
Input to Output	4000V <sub>rms</sub>
Input and Output to case	4000V <sub>rms</sub>
Input to Fan/ Alarm Output/Input to Output	2500V <sub>rms</sub> (Cat. No. 156-C1P85NCB)

**Table 3 - Standards Compliance and Certifications**

Standards Compliance	Certifications
EN 62314	UL508 Listed (E172877)
EN 60947-4-2	cUL Listed (E172877)
EN 60947-4-3	VDE 0660-109
	GL (156-C1P20, 156-C1P25, 156-C1P43)

**Table 4 - Environmental Specifications**

Attribute	Description
Operating Temperature <sup>(1)</sup>	-40...80 °C (-40...176 °F)—derate above 40 °C (104 °F)
Storage Temperature	-40...100 °C (-40...212 °F)
RoHS Compliance (2002/95/EC)	Yes
Vibration resistance	2G per axis (2...100 Hz) (per IEC60068-2-6, EN50155, EN61373)
Impact resistance	15/11 g/ms (per EN50155, EN61373)
Relative humidity	95% noncondensing @ 40 °C
UL flammability rating (housing)	UL 94 V0
GWIT & GWFI	conforms to EN 60335-1 requirements
Installation altitude	0...1000 m. Above 1000 m, derate linearly by 1% of FLC per 100 m up to maximum of 2000 m

(1) Operating temperature range for overtemperature protection is -30...70 °C (-22...158 °F)

**Table 5 - Weights**

Cat. No.	Approximate Weight [g (lbs)]
156-C1P20	260 (0.57)
156-C1P25	260 (0.57)
156-C1P43	515 (1.14)
156-C1P65	972 (2.14)
156-C1P85	1100 (2.43)

**Table 6 - Output Specifications @ 25°C (unless otherwise specified)**

Attribute	Description					
	156-C1P20	156-C1P25	156-C1P43	156-C1P65	156-C1P85	
Rated operational current <sup>(1)</sup>						
AC-51 rating @ T <sub>a</sub> = 25 °C	[A]	20	30	50	75	85
AC-51 rating @ T <sub>a</sub> = 40 °C	[A]	20	25	43	65	85
AC-53a rating @ T <sub>a</sub> = 40 °C	[A]	5	5	16	20	20
Number of motor starts (x:6, T <sub>x</sub> :6 s, F:50%) at 40 °C <sup>(2)</sup>		30	30	30	30	30
Min. operational current	[mA]	150	250	500	500	500
Rep. overload current - (Motor Rating) PF = 0.4... 0.5 UL508: T <sub>AMB</sub> =40 °C, t <sub>ON</sub> =1 s, t <sub>OFF</sub> =9 s, 50 cycles	[A]	51	51	126	168	168
Maximum transient surge current (I <sub>TRM</sub> ), t = 10 ms	[A <sub>p</sub> ]	325	600	1900	1900	1900
Maximum off-state leakage current at rated voltage	[mA]	3	3	3	3	3
I <sup>2</sup> t for fusing (t = 10 ms) Minimum	[A <sup>2</sup> s]	525	1800	18,000	18,000	18,000
Critical dv/dt (@ T <sub>j</sub> init = 40 °C)	[V/μs]	1000	1000	1000	1000	1000

(1) See derating curves

(2) Overload current profile definition: x: multiple of AC53a rating, Tx: duration of current surge, F: duty cycle

**Table 7 - Overtemperature Alarm Specifications**

Attribute	Description		
	156-C1P85NCD	156-C1P85NCB	
Output type	PNP open collector	Potential Free	
Normal state	Closed	Closed	
Maximum current rating	[mA DC]	50	50
Rated voltage (EN61131-2: 2003) <sup>(1) (2)</sup> , U <sub>a</sub>	[V DC]	24 -15%, +20%	24 -15%, +20%
Rated voltage, U <sub>s</sub>	[V DC]	24 ± 10%	—
Fan rating, U <sub>f</sub>	[V DC]	—	24 ± 10%, 50 mA nominal
Alarm voltage drop			
Typical	[V DC]	2.8	1.8
Maximum	[V DC]	4	3.5
Visual Indication		Continuous Red LED	Continuous Red LED
Reverse polarity protection	[V DC]	24	24

(1) DC supply for alarm signal should be supplied from a Class 2 power source

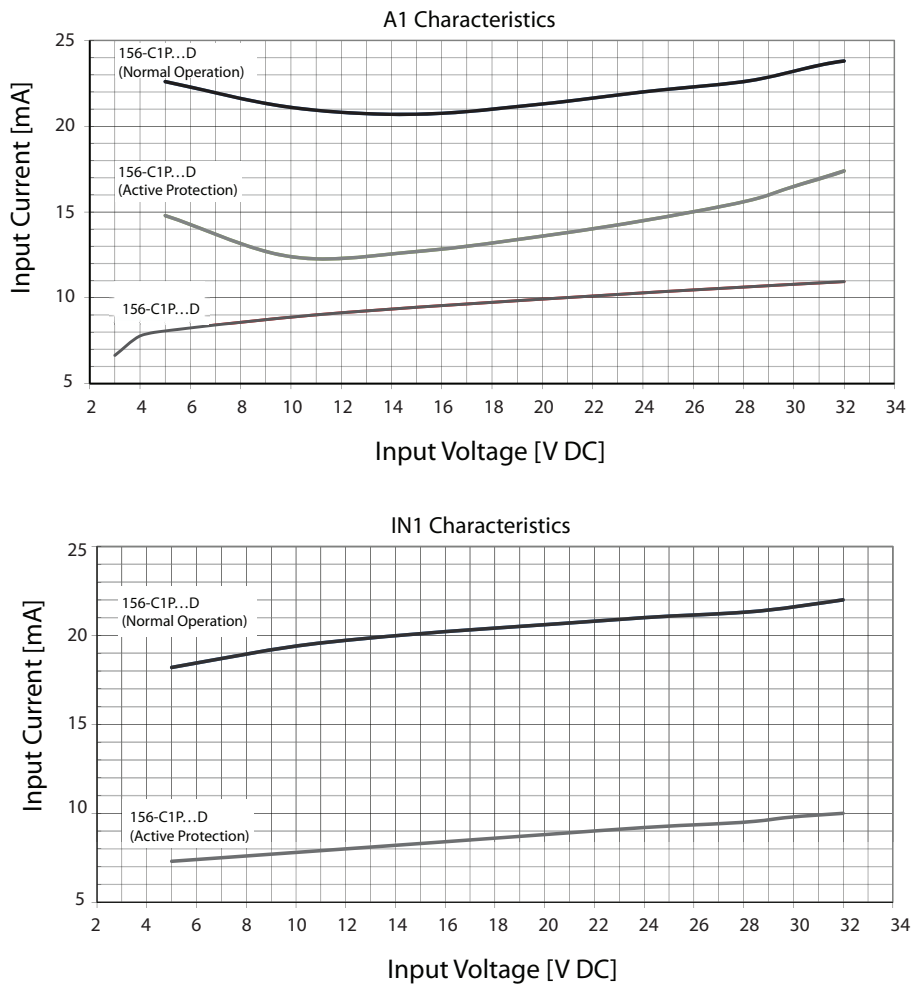

(2) Maximum voltage to be applied between 11+ and 12- (U<sub>a</sub>) terminals should be 35VDC maximum with reference to A2-

**Table 8 - Input Specifications (A1, A2)**

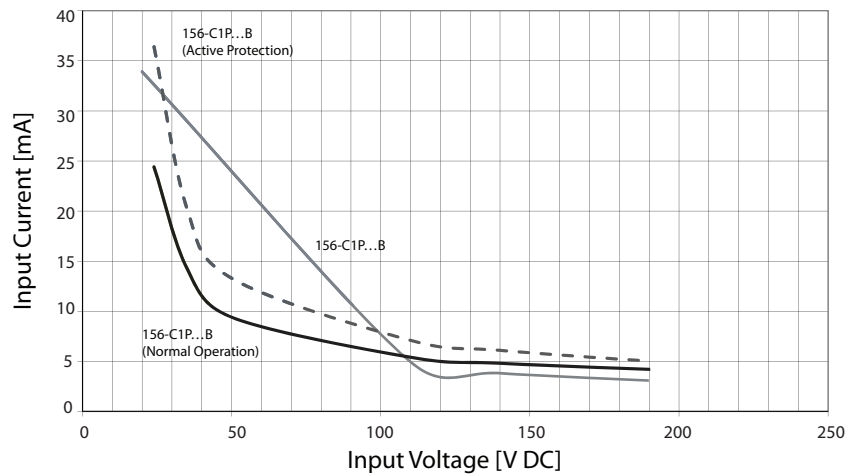

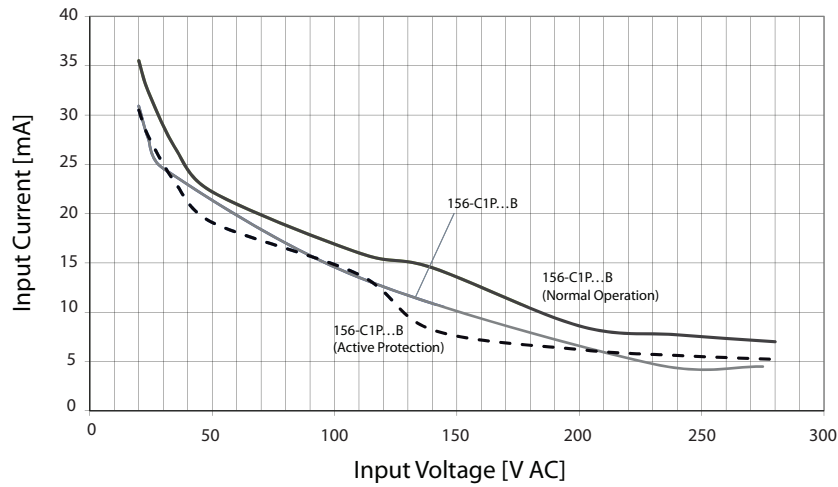

Attribute	Description	
	156-C1P...D	156-C1P...B
Control voltage range <sup>(1) (2)</sup>	156-C1P...NA [V AC]	—
	[V DC]	3...32
	156-C1P...NC [V AC]	—
	[V DC]	4...32
Pick-up voltage	156-C1P85NC [V AC]	—
	[V DC]	5...32
	156-C1P...NA [V DC]	3.0
Drop-out voltage	156-C1P...NC [V DC]	3.8
	156-C1P85NC [V DC]	5
Maximum Reverse voltage	[V DC]	1
Response time pick-up		0.5 cycle + 500 μs @ 24V DC
Response time drop-out		0.5 cycle + 500 μs @ 24V DC
Input current @ 40 °C	[V DC]	See <a href="#">Figure 1</a>

(1) DC control to be supplied by class 2 power source according to UL1310  
 (2) For GL approved models control range for 156-C1P23... is 4...32V DC and for 156-C1P60... 5...32V DC

**Figure 1 - 156-C1P...D Input Current vs. Input Voltage**

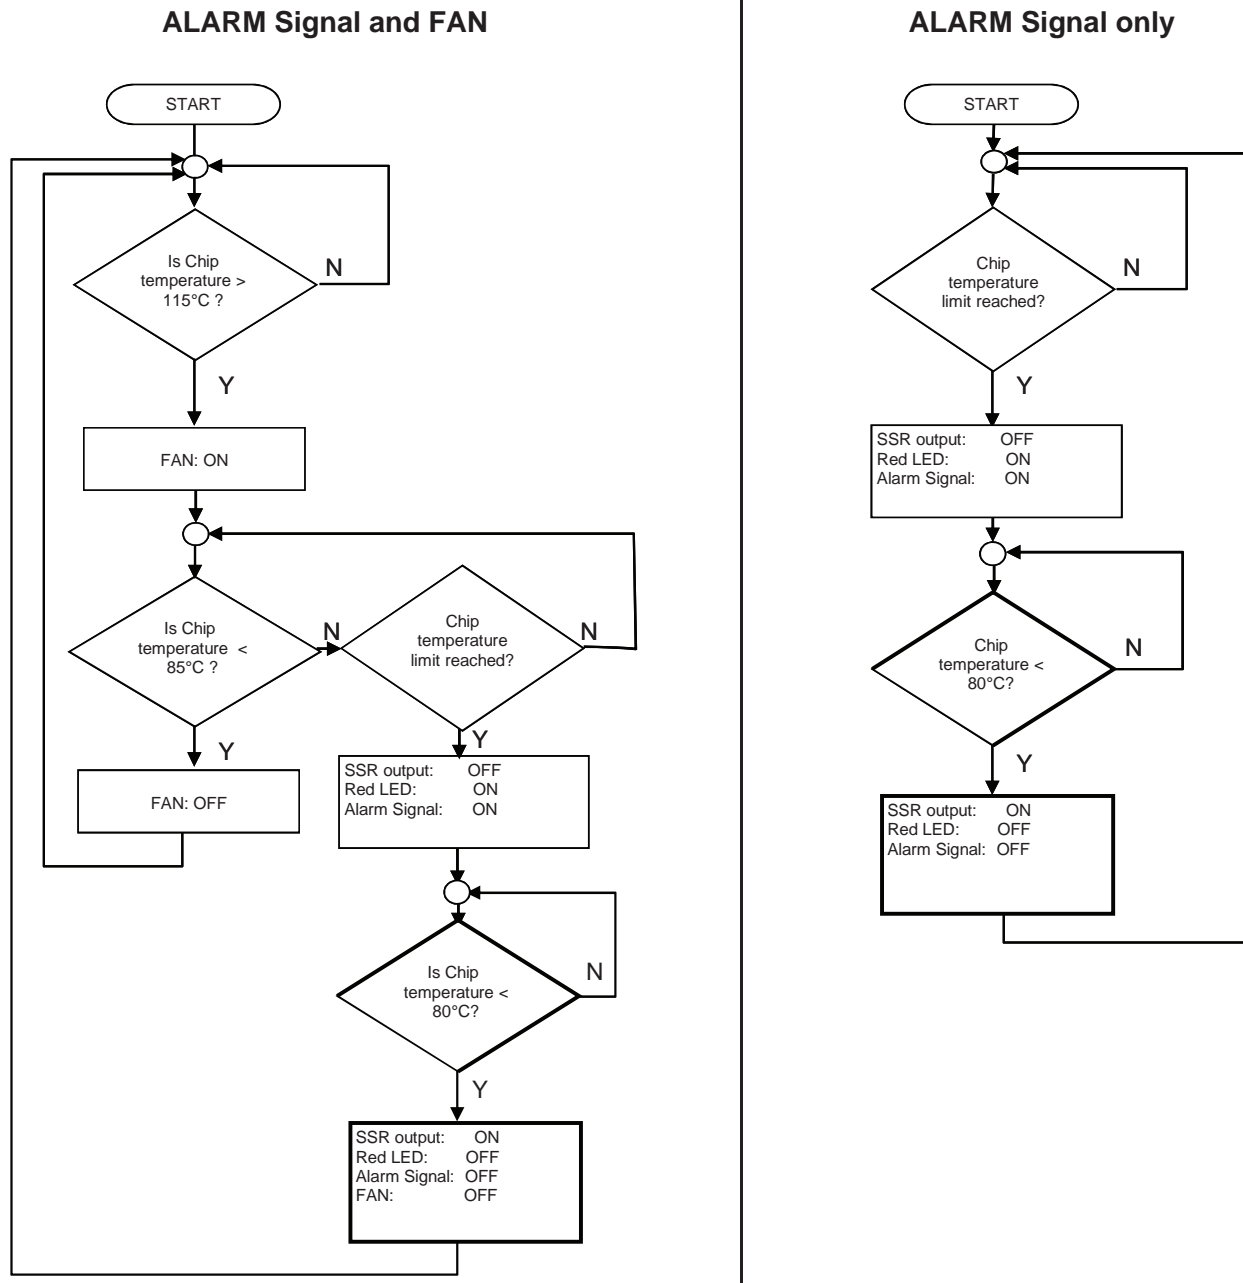

**Figure 2 - 156-C1P...B A1 Input Current vs. Input Voltage**

**Table 9 - Motor Ratings: Hp (UL508) / kW (EN/IEC60947-4-2) @ 40 °C**

Cat. No.	Rated Voltage [V AC]					
	115	230	400	480	600	
156-C1P20	[Hp]	1/3	1	2	3	3
	[kW]	0.18	0.37	0.75	1.1	1.5
156-C1P25	[Hp]	1/3	1	2	3	3
	[kW]	0.18	0.37	0.75	1.1	1.5
156-C1P43	[Hp]	1-1/2	3	5	7-1/2	10
	[kW]	0.56	1.5	2.2	3.7	4
156-C1P65	[Hp]	2	5	7-1/2	10	15
	[kW]	0.75	1.5	4	4	5.5
156-C1P85	[Hp]	2	5	7-1/2	10	15
	[kW]	0.75	1.5	4	4	5.5

Figure 3 - Detailed Overtemperature Alarm Procedure (for Cat. No. 156-C1P85NC)

**NOTE:**

- Alarm condition resets whenever the voltage signal is removed from terminal A1 (+)
- If the voltage signal is not applied across A1(+) and A2(-) terminals, the overtemperature detection and functionality is lost (including fan operation and alarm signaling)
- It is necessary to supply IN2 and IN3 with 24V DC for fan operation.
- Alarm procedure follows 'Alarm signal only' flow since fan is continuously operating.
- Alarm condition automatically resets ONLY when power semiconductor temperature < 80°C
- Temperatures indicated are typical figures.

Figure 4 - Output Power Dissipation

## Electromagnetic Compatibility

Table 10 - Electromagnetic Compatibility Ratings

Attribute	Standard Compliance
EMC immunity	EN/IEC 61000-6-2
Electrostatic discharge (ESD) immunity	EN/IEC 61000-4-2
Air discharge, 8kV	Performance Criteria 1
Contact, 4kV	Performance Criteria 1
Electrical fast transient (Burst) immunity	EN/IEC 61000-4-4
Output: 2kV, 5 kHz	Performance Criteria 1
Input: 1kV, 5 kHz	Performance Criteria 1
Electrical surge immunity (for devices without overtemperature protection)	EN/IEC 61000-4-5
Output, line to line, 1kV	Performance Criteria 1
Output, line to earth, 2kV	Performance Criteria 1
Input, line to line, 1kV (A1, A2)	Performance Criteria 2
Input, line to earth, 2kV (A1, A2)	Performance Criteria 2
EMC emission	EN/IEC 60947-4-3
Radio interference voltage emission (conducted)	EN/IEC 55011
0.15...30 MHz	Class A (Industrial) with filters - see <a href="#">Table 11</a>
	IEC/EN 60947-4-2, 60947-4-3 Class A (no filtering needed)

Attribute	Standard Compliance
Electrical surge immunity (for devices with overtemperature protection)	EN/IEC 61000-4-5
Output, line to line, 1kV	Performance Criteria 1
Output, line to earth, 2kV	Performance Criteria 1
DC lines, line to line, 500V	Performance Criteria 2
DC lines, line to earth, 500V	Performance Criteria 2
Signal lines, line to line, 1kV	Performance Criteria 2
Radiated radio frequency immunity	EN/IEC 61000-4-3
10V/m, 80...1000 MHz	Performance Criteria 1
10V/m, 1.4...2.0 GHz	Performance Criteria 1
3V/m, 2.0...2.7 GHz	Performance Criteria 1
Conducted radio frequency immunity	EN/IEC 61000-4-6
10V/m, 0.15...80 MHz	Performance Criteria 1
Voltage dips immunity	EN/IEC 61000-4-11
0% for 10 ms/20 ms	Performance Criteria 2
40% for 200 ms	Performance Criteria 2
70% for 500 ms	Performance Criteria 2
Voltage interruptions immunity	EN/IEC 61000-4-11
0% for 5000 ms	Performance Criteria 2
Radio interference field emission (radiated)	EN/IEC 55011
30...1000 MHz	Class A (Industrial)

Table 11 - Filtering - EN / IEC 55011 Class A compliance

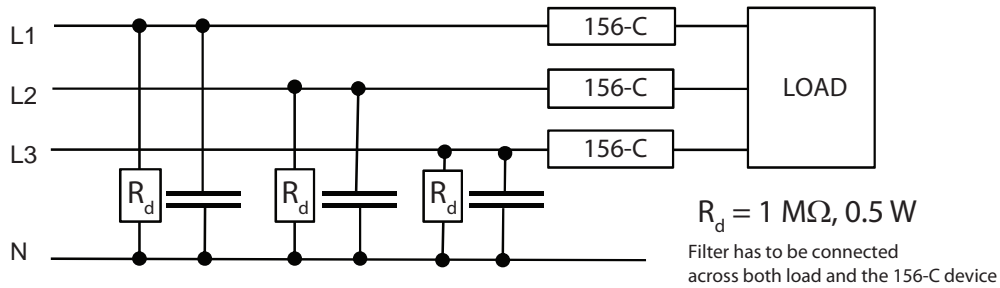

Cat. No.	Suggested Filter for Compliance <sup>(1)</sup>	Max. Heater Current [A]
156-C1P20NA	68 nF / 275 V / X1	20
156-C1P25NA	220 nF / 275V / X1	30
156-C1P20NC	100 nF / 760V / X1	20
156-C1P25NC	220 nF / 760V / X1	30
156-C1P62NC	330 nF / 760V / X1	40
156-C1P92NC	470 nF / 760V / X1	65

(1) Class A Compliance only. For Class B compliance, contact your local Rockwell Automation sales office or Allen-Bradley distributor.

## Note:

- Control input lines must be installed together to maintain products' susceptibility to radio frequency interference.
- Use of AC solid-state contactors may, according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C. requirements. The capacitor values given inside the filtering specification tables should be taken only as indications; the filter attenuation depends on the final application.
- Performance Criteria 1: No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2: During the test, degradation of performance or partial loss of function is allowed. However, when the test is completed, the product should return operating as intended by itself.
- Performance Criteria 3: Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.

**Figure 5 - Filter Connection Diagrams**

**Figure 6 - Connection Diagram—No Overtemperature Protection**

AC Controlled

In AC controlled types only, a varistor is placed across A1/A2 terminals.

DC Controlled

In DC controlled types only, a diode is placed in series with the control circuit for protection against reverse biased connection.

Terminal Label	Description
1/L1	Main connection
2/T1	Load connection
A1(+)	Positive control signal
A2(-)	Control ground

**Figure 7 - Connection Diagram—With Overtemperature Protection**

**Table 12 - Power Connection (1/L1, 2/T1) Specifications**

Attribute		Cat. Nos.		
		156-C1P20, -C1P25		156-C1P65, -C1P85
Conductor		Use 75 °C copper (Cu) conductors

## Short Circuit Protection

### Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test is no longer in a functioning state. In type 2 co-ordination the device under test is still functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 100,000 A<sub>rms</sub> Symmetrical Amperes, 600 Volts maximum when protected by fuses. Tests at 100,000 A were performed with Class J fuses, fast acting; please refer to [Table 15](#) and [Table 16](#) for maximum allowed ampere rating of the fuse. Use fuses only.

Tests with Class J fuses are representative of Class CC fuses.

**Table 15 - Type 1 Coordination Ratings (UL 508)**

Cat. No.	Prospective Short Circuit Current [kA <sub>rms</sub> ]	Max. Fuse Size [A]	Fuse Class	Max. Rated Voltage [V AC]
156-C1P20	100	30	J or CC	600
156-C1P25	100	30	J or CC	600

**Notes:**

## Specifications—Dual- and Three-phase Devices

**Table 19 - Output Voltage**

Attribute	Description	
	230V AC	600V AC
Operational Voltage Range	42...220V AC, +10%, -15% on max.	42...600V AC, +10%, -15% on max.
Blocking Voltage	800Vp	1200Vp
Internal Varistor	275V	625V

**Table 20 - General Specifications**

Attribute	Description
Short Circuit Current Rating	100 kA (UL508)
Latching voltage (across each pole L-T)	<20V
Operational frequency range	45...65 Hz
Power factor	> 0.5 @ $V_{rated}$
CE Marking	Yes
Touch Protection	IP20
LED status indication	
Control ON	Green, full intensity
Supply ON	Green, full intensity
Load ON	Green, full intensity
Alarm ON	Red, full intensity (option with fan)
Pollution degree	2 (non-conductive pollution with possibilities of condensation)
Overvoltage category	III (fixed installations)
Isolation	
Input to Output	4000V <sub>rms</sub>
Input and Output to case	4000V <sub>rms</sub>

**Table 21 - Standards Compliance and Certifications**

Standards Compliance	Certifications
EN 60947-4-2	UL508 Listed (E172877)
EN 60947-4-3	cUL Listed (E172877), C22.2 No. 14-13

**Table 22 - Environmental Specifications**

Attribute	Description
Operating Temperature	
No fan	-40...80 °C (-40...176 °F)—derate above 40 °C (104 °F)
24V DC fan control	-40...70 °C (-40...158 °F)—derate above 40 °C (104 °F)
90...250V AC fan control	-40...60 °C (-40...140 °F)—derate above 40 °C (104 °F)
Storage Temperature	-40...100 °C (-40...212 °F)
Vibration resistance	2G per axis (2...100 Hz) (per IEC60068-2-6, EN50155, EN61373)
Impact resistance	15/11 g/ms (per EN50155, EN61373)
Relative humidity	95% non-condensing @ 40 °C
UL flammability rating (housing)	UL 94 V0
Installation altitude	0...1000 m. Above 1000 m, derate linearly by 1% of FLC per 100 m up to maximum of 2000 m

**Table 23 - Weights**

Cat. No.	Approximate Weight [g (lbs)]
156-C2P25	600 (1.32)
156-C2P40, 156-C3P25, 156-C3P30	850 (1.87)
156-C3P40	740 (1.63)

## Electromagnetic Compatibility

**Table 30 - Electromagnetic Compatibility Ratings**

Attribute	Standard Compliance	Attribute	Standard Compliance
EMC immunity	EN/IEC 61000-6-2	Radio interference voltage emission (conducted)	EN/IEC 55011
Electrostatic discharge (ESD) immunity	EN/IEC 61000-4-2	0.15...30 MHz	Class A (Industrial) with filters - see <a href="#">Table 31</a>
Air discharge, 8kV	Performance Criteria 2	Radiated radio frequency immunity	EN/IEC 61000-4-3
Contact, 4kV	Performance Criteria 2	10V/m, 80...1000 MHz	Performance Criteria 1
Electrical fast transient (Burst) immunity	EN/IEC 61000-4-4	10V/m, 1.4...2.0 GHz	Performance Criteria 1
Output: 2kV, 5 kHz	Performance Criteria 1	10V/m, 2.0...2.7 GHz	Performance Criteria 1
Input: 1kV, 5 kHz	Performance Criteria 1	Conducted radio frequency immunity	EN/IEC 61000-4-6
Electrical surge immunity	EN/IEC 61000-4-5	10V/m, 0.15...80 MHz	Performance Criteria 1
Output, line to line, 1kV	Performance Criteria 1	Voltage dips immunity	EN/IEC 61000-4-11
Output, line to earth, 2kV	Performance Criteria 1	0% for 0.5/1cycle	Performance Criteria 2
Input, line to line, 1kV (A1, A2)	Performance Criteria 2	40% for 10 cycles	Performance Criteria 2
Input, line to earth, 2kV (A1, A2)	Performance Criteria 2	70% for 250 cycles	Performance Criteria 2
11, 12, 14, line to line, 1kV	Performance Criteria 1	Voltage interruptions immunity	EN/IEC 61000-4-11
11, 12, 14, line to earth, 2kV (versions with fan only)	Performance Criteria 1	0% for 5000 ms	Performance Criteria 2
EMC emission	EN/IEC 60947-4-3 <sup>(1)</sup>	Radio interference field emission (radiated)	EN/IEC 55011
		30...1000 MHz	Class A (Industrial)

(1) For conformance to EN/IEC 61000-6-4, an external capacitor class X1, 220nF, 275VAC is to be connected across the input control lines A1-A2 for AC control versions.

### Note:

- Control input lines must be installed together to maintain products susceptibility to Radio Frequency Interference.
- Use of AC solid-state contactors may according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C requirements. The capacitor values given inside the filtering specification tables are only indications, the filter attenuation depends on the final application.
- This product has been designed for Class A equipment. Use of this product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.
- Surge tests were carried out with the signal line impedance network. In case the line impedance is less than 40Ω, it is suggested that AC supply is provided through a secondary circuit where the short circuit limit between conductors or between conductors and ground is 1500VA or less.

### Performance Criteria Definitions:

- Performance Criteria 1 (Performance Criteria A): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (Performance Criteria B): During the test, degradation of performance or partial loss of function is allowed. However, when the test is completed, the product should return operating as intended by itself.
- Performance Criteria 3 (Performance Criteria C): Temporary loss of function is allowed, provided the function can be restored by manual operation of the control.

**Table 31 - Filtering - EN / IEC 55011 Class A compliance**

Cat. No.	Suggested Filter for Compliance	Max. Heater Current [A]
156-C2P25NA	220nF / 275V /X1	25
156-C2P25NC	220nF / 760V /X1	25
156-C2P40NC	330nF / 760V /X1	40
156-C2P75NC	470nF / 760V /X1	65
156-C3P20NA	220nF / 275V /X1	25
156-C3P20NC	220nF / 760V /X1	25
156-C3P25NC	330nF / 760V /X1	25
156-C3P30NC	470nF / 760V /X1	30
156-C3P40NC	470nF / 760V /X1	40
156-C3P65NC	470nF / 760V /X1	65

Short Circuit Protection

Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test is no longer in a functioning state. In type 2 co-ordination the device under test is still functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in [Table 35](#) are suitable for use on a circuit capable of delivering not more than 100,000 A<sub>rms</sub> Symmetrical Amperes, 600 Volts maximum when protected by fuses. Tests at 100,000 A were performed with Class J fuses, fast acting; refer to [Table 35](#) and for maximum allowed ampere rating of the fuse. Use fuses only.

Tests with Class J fuses are representative of Class CC fuses.

	1492-SPM1B250	4.0	8.0
		6.0	12.0
		10.0	20.0
		16.0	32.0
		16.0	32.0
	1492-SPM1B320	6.0	11.3
		10.0	18.8
		16.0	30.0

(1) A prospective current of 6 kA and a 230/200V power supply system is assumed for these specifications. For cables with different cross sections, consult Technical Support.

(2) Between the miniature circuit breaker and the load (including the return path, which goes back to the main if applicable).

## Application Diagrams

### Applications for Non-motor Loads

#### Dual-phase Contactors

Figure 36 - Dual-phase Contactor, Line-Neutral/Line-Line Connection

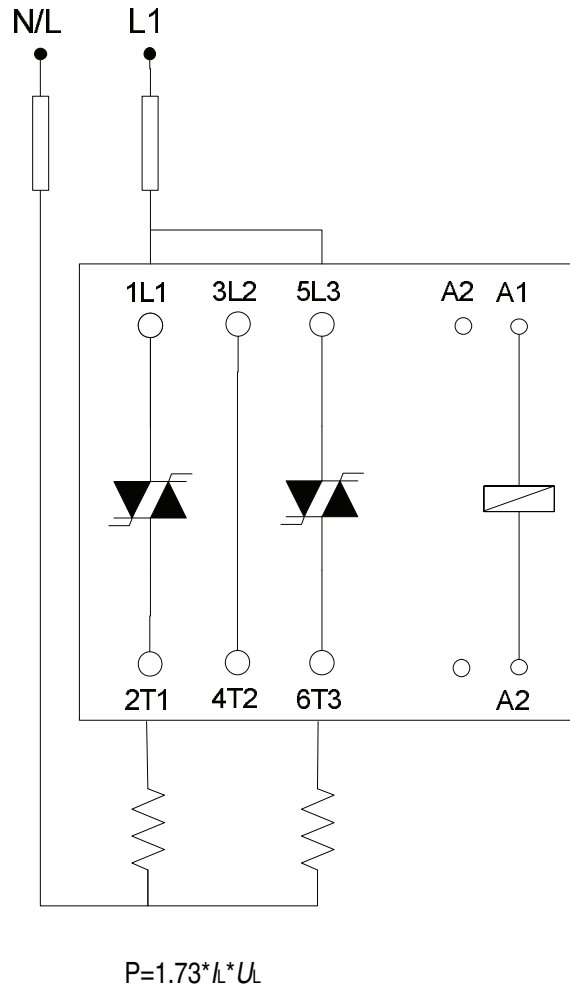

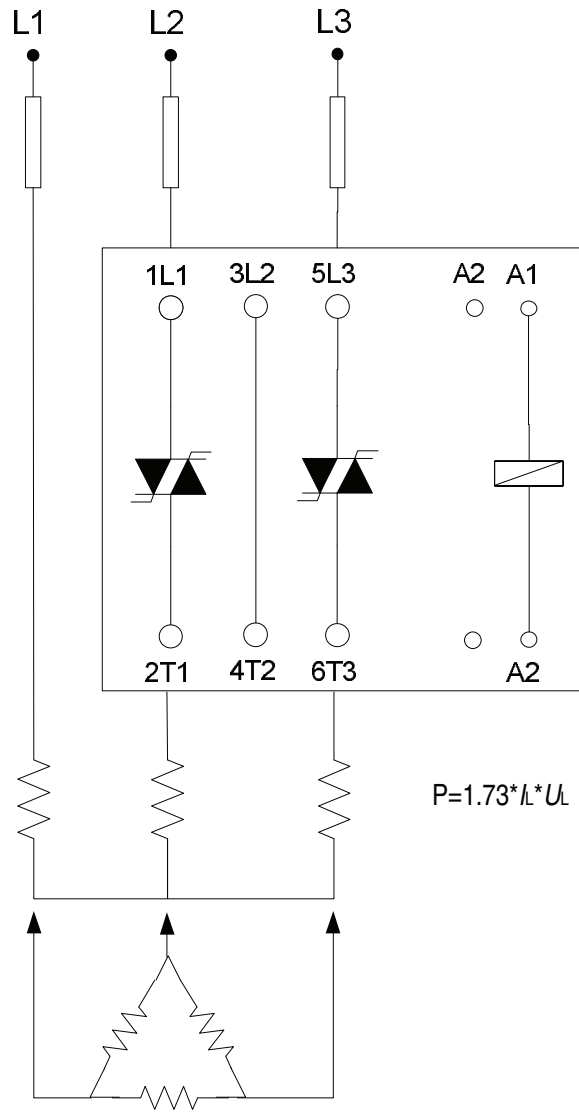

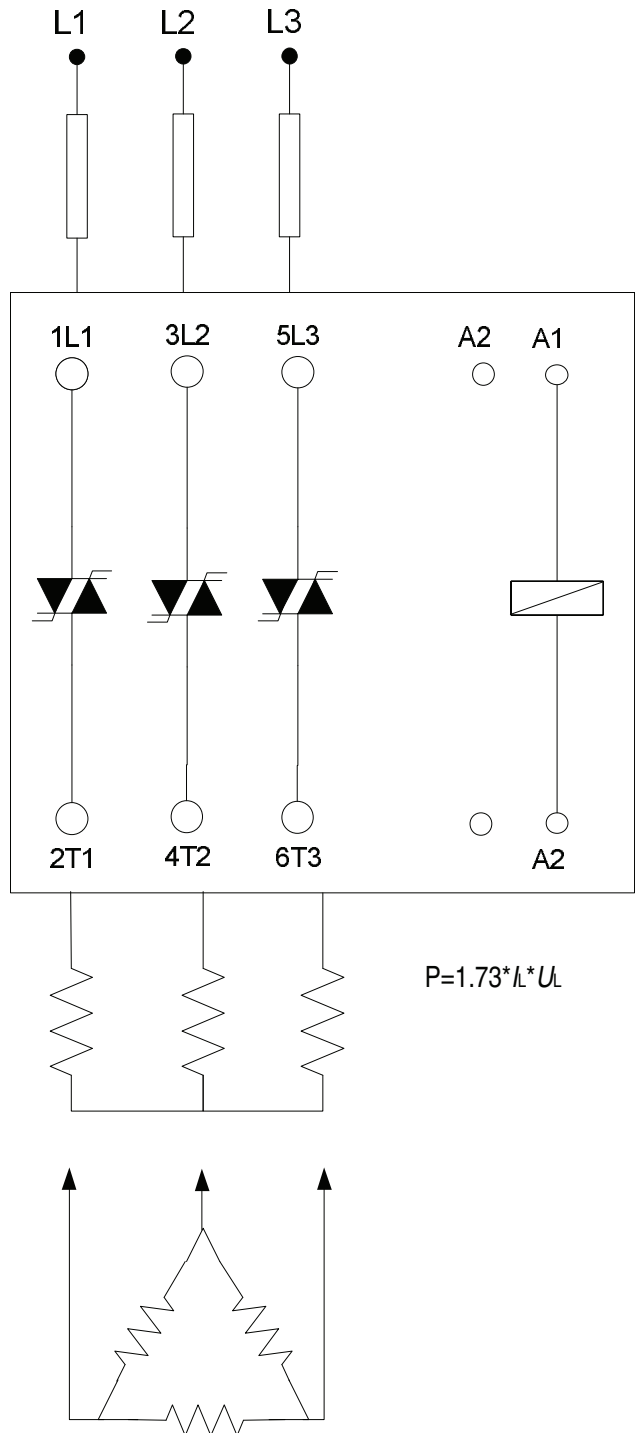

Figure 37 - Dual-phase Contactor in Three-phase Application, Delta and Star Connection

Three-phase Contactors

Figure 38 - Three-phase Contactor, Delta and Star Connection

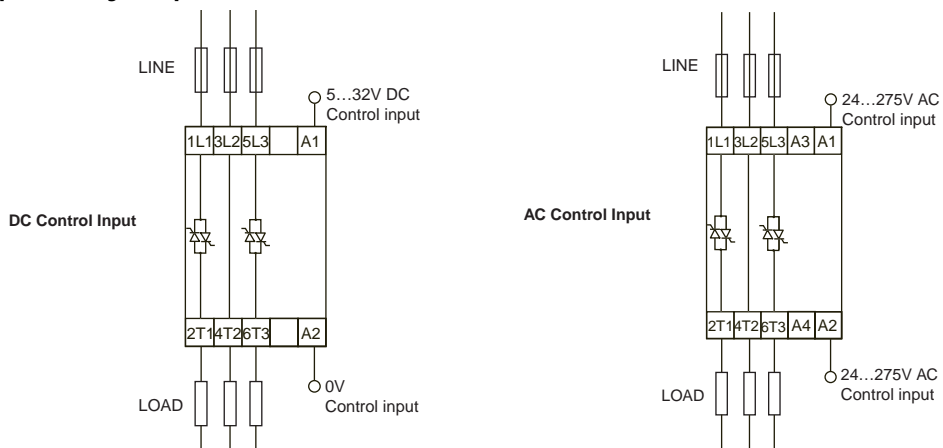

## Recommended Contactor Spacings

## Wiring Diagrams

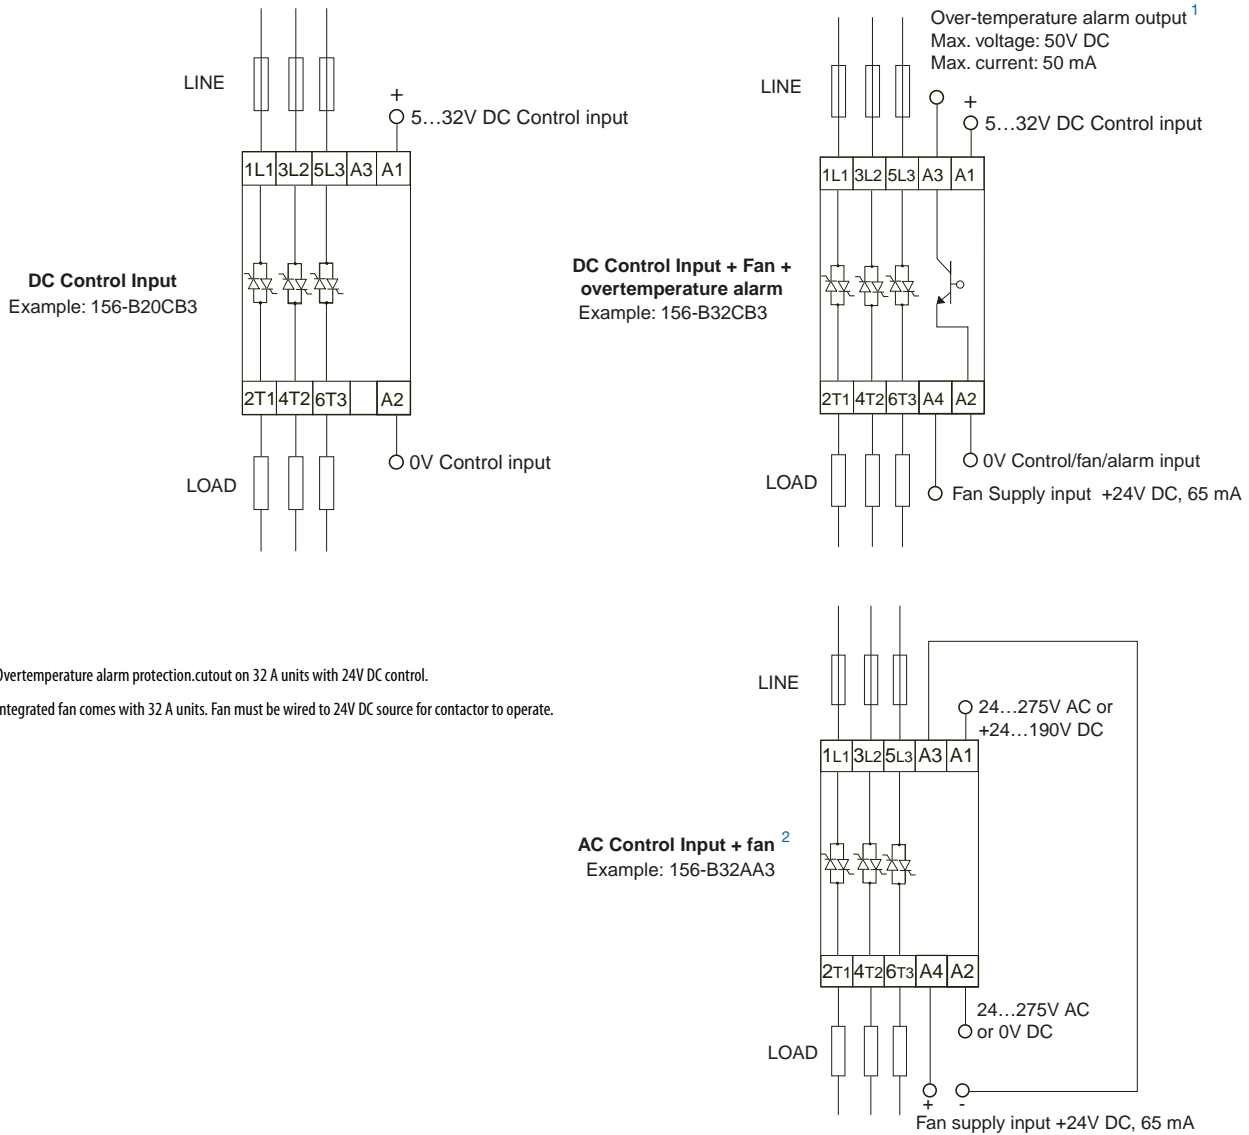

### Dual-phase Devices

Figure 39 - Dual-phase wiring example

### Three-phase Devices

**Figure 40 - Three-phase wiring example**

- 1) Overtemperature alarm protection.cutoff on 32 A units with 24V DC control.
- 2) Integrated fan comes with 32 A units. Fan must be wired to 24V DC source for contactor to operate.

## Approximate Dimensions

Dimensions in millimeters (inches). Dimensions are not intended for manufacturing purposes.
