

Micro800™ Starter Packs

Discover the capabilities of the Allen-Bradley® Micro800 controllers

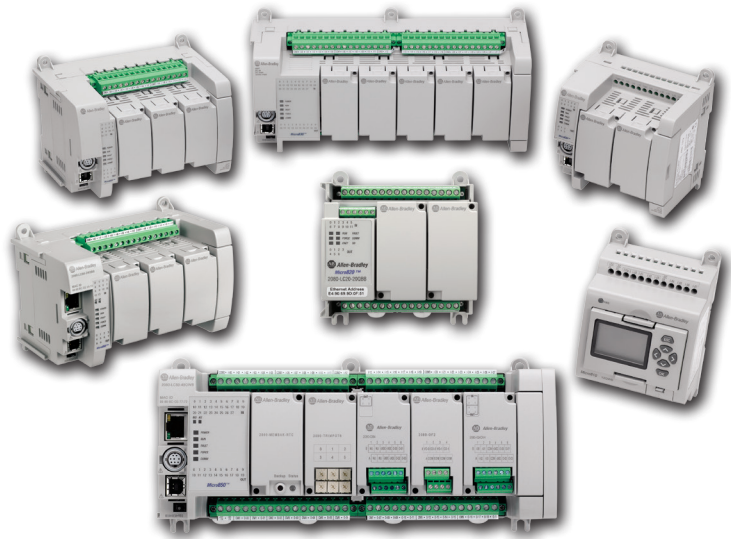

Micro800 Controllers Starter Pack Benefits

Starter packs are a great way to try out a smart micro automation solution without making high up-front investments.

Each starter pack contains the hardware you will need to familiarize yourself with the Micro800 controllers and their features.

Contents per pack are:

- Micro800 controller
- Micro800 controller 24V DC power supply
- Micro800 controller accessories
- Input simulator
- Programming cable

The Allen-Bradley Micro800 controllers, together with the Connected Components Workbench™ software, set a new global standard for convenience and ease of use, while providing just the right control capability to match your micro application requirements. These controllers provide customizable and cost-effective solutions with plug-in and expansion I/O modules.

Designed for standalone machines, the Micro800 controllers come in a variety of form factors to address a wide range of application requirements. For instance, the Micro810® controller is suitable for smart relay applications, while the Micro820™ controller is ideal for small applications with Ethernet connectivity. Finally, the Micro850® controller would be an optimal choice for larger applications with simple motion control.

Experience the capabilities of Micro800 controllers with this starter pack today.
