<b>Product</b>	<b>140M</b> Motor Protection Circuit Breaker	<b>140M</b> Motor Circuit Protector	<b>140UE</b> Molded Case Circuit Breaker	<b>140U</b> Molded Case Circuit Breaker
<b>Function &amp; Applications</b>	Function: Protection of motor load and motor starters in case of overload, short circuit and phase loss (MPCB only)  For disconnect means apply lockable actuator.  Application : Machine control panels, Motor Control Centers; enclosed starters for protection of single motor. Basic motor overload protection for Pumps, Conveyors, Fans, etc.		Function: Protection of circuits against overload, short circuit and ground fault.  Application: As both main and branch circuit protection device in panelboards, switchboards, bus-bar trunking tap-offs, individual enclosures.	
<b>Standards</b>	<ul style="list-style-type: none"> <li>• IEC/EN 60947-1; -2; -4</li> <li>• UL489 <sup>1)</sup></li> <li>• CSA 22.2 No.5 <sup>1)</sup></li> <li>• CCC</li> <li>• CE</li> </ul> <p><sup>1)</sup> for 140M-C/D/F and 140M-CMN                  UL 508, CSA 22.2 No 14                  for detailed information refer to technical documentation</p>		<ul style="list-style-type: none"> <li>• IEC/EN 60947-2</li> <li>• KEMA-KEUR</li> <li>• CE</li> </ul>	<ul style="list-style-type: none"> <li>• IEC/EN 60947-2</li> <li>• UL489</li> <li>• CSA 22.2 No.5</li> <li>• KEMA-KEUR</li> <li>• CCC</li> <li>• CE</li> </ul>
<b>Key Features</b>	<ul style="list-style-type: none"> <li>• Compact design</li> <li>• Interrupting capacity from 18 to 100 kA</li> <li>• Common accessories (field-fit) 140M-C/D/F and for 140M/U/UE - H/J/L frame</li> <li>• Electronic trip unit available from 20 to 2500 Amps</li> <li>• Wide range of operating mechanisms to fit with a variety of panel configurations</li> <li>• Rotary variable-depth operating mechanism with internal handle to comply with NFPA79 requirements (available for 140U/140M molded case circuit breakers)</li> </ul>			
<b>Key Benefits</b>	<ul style="list-style-type: none"> <li>• Current limiting features prevent contactor oversizing when Type 2 coordination is required.</li> <li>• Eliminates the need for separate overload relays, saving panel space and wiring time.</li> </ul>	<ul style="list-style-type: none"> <li>• Accurate magnetic trip setting for the best possible protection of the motor against short circuit current and nuisance tripping during starting phase</li> </ul>	<ul style="list-style-type: none"> <li>• Broad interrupting capacity range allows a single unit to address many applications, thereby reducing number of different products to be stocked</li> <li>• Simplification of the panel design thanks to common accessories through 630 Amps</li> <li>• Time savings and flexibility through field installable accessories</li> <li>• Significant panel space savings based on compact housing design (e.g. 125 &amp; 250 Amp frame size)</li> </ul>	

<b>1492-SP</b> Miniature Circuit Breaker	<b>1489</b> Miniature/Industrial Circuit Breaker	<b>1492-RCD</b> Residual Current Device	<b>140U/140UE</b> Molded Case Switches	<b>194E</b> Disconnect Switch	<b>194R</b> Fused and Non-Fused Disconnect Switches
<p>Function: Protection of control circuitry and load components against overload and short circuit</p> <p>Application: Protection of solenoids, test equipment, controller I/O points, relays and contactor coils, computers, transformers, power supplies, control instrumentation, etc</p>		<p>Function: Detection and interruption of earth leakage</p> <p>Application: Protection of personnel and machinery against potentially hazardous earth leakage</p>	<p>Function: Disconnection and isolation of the circuit or part of a circuit or single load</p> <p>Application: As main disconnecting device in machine tool control panel, panelboards, switchboards</p>		<p>Function: Disconnection and protection against short circuit (fused type) of the circuit or part of a circuit</p> <p>Application: As main disconnecting device in machine tool control panel, panelboards, switchboards</p>
<ul style="list-style-type: none"> <li>• “Miniature Circuit Breaker” for IEC applications</li> <li>• IEC/EN 60898</li> <li>• IEC/EN 60947-2</li> <li>• Recognized as supplementary protectors UL1077</li> <li>• UL File No. E6513</li> </ul>	<ul style="list-style-type: none"> <li>• “Industrial Circuit Breaker” for North American applications</li> <li>• UL489</li> <li>• IEC/EN 60947-2</li> <li>• UL File No. E197878</li> </ul>	IEC/EN 61008	<p>140U:</p> <ul style="list-style-type: none"> <li>• UL489</li> <li>• CSA 22.5 No5</li> </ul> <p>140U &amp; 140UE:</p> <ul style="list-style-type: none"> <li>• IEC/EN 60947-2</li> <li>• KEMA-KEUR</li> <li>• CE</li> </ul>	<ul style="list-style-type: none"> <li>• IEC/EN 60947-1</li> <li>• IEC/EN 60947-3</li> <li>• IEC207</li> <li>• UL508 (At-Motor Disconnect Switch)</li> </ul>	<ul style="list-style-type: none"> <li>• IEC/EN 60947-1</li> <li>• IEC/EN 60947-3</li> <li>• IEC207</li> <li>• UL98 (service entrance disconnecting means)</li> <li>• UL508 (At-Motor Disconnect Switch)</li> </ul>

## Broad Selection of Quality Products

Rockwell Automation offers a full line of Allen-Bradley circuit breakers and motor protection devices to meet most global application needs. They have a wide current range (0.5...2500 A) and a large variety of functions. These components are accompanied by a full range of accessories and operating/mounting options to satisfy a range of installation needs. From miniature circuit breakers to molded case circuit breakers and fused disconnect switches, there is a complete Allen-Bradley power control solution for you whether you are building panels or machines, in local installations or for the global market.

## Global Solutions and Faster Time-to-Market

"Protect and Disconnect" from Rockwell Automation conform to IEC and North American standards, making them a truly global solution. As a result, panel- and machine-builders can design and ship standardized products worldwide, significantly reducing time-to-market.

## Modularity and flexibility to simplify installation

Flexible mounting options (DIN rail, on-panel, plug-in or modular mounting system) combined with multiple connection possibilities (lugs, bus bars, commoning links or modular wiring system) make installation of Allen-Bradley circuit and load protection devices extremely quick and simple.

In addition, field-installed accessories allow you to customize or modify the product configuration on-site and still maintain the UL Listing.

## Proven, reliable motor protection

Rockwell Automation offers more than 30 years of expertise and proven performance in circuit breaker and motor starter technologies. Short circuit coordinations are available for motors from 0.1 to 630 kW, fault currents up to 100 kA, and operational voltages up to 690 V.

IEC Type 2 rating and high Short Circuit Current Ratings are also possible thanks to efficient and reliable motor protection circuit breakers designed with sophisticated current limiting technology.

## Maximize panel space

The compact size of Allen-Bradley protection and disconnection devices provides significant panel space savings – up to 30 % in 125 & 250 Amps molded case circuit breaker frames, for example. Plus, these modular products, in conjunction with installation by the 141A modular mounting system makes panel design extremely simple with intuitive cabinet layout.

## One-Stop Supplier with Worldwide Support

In Rockwell Automation you get the complete portfolio of Industrial Control and Integrated Architecture products you need, wherever and whenever you need them. As your one-stop shop, we can simplify the purchasing process and assure product availability thanks to our distributor partners in more than 80 countries. Plus, our global network of technical support and service specialists are available to assist in the selection, operation and maintenance of your Allen-Bradley solutions.

### Notes

- <sup>1)</sup> Interrupting capacity varies according to Amp rating. Please consult on-line catalog for more details
- <sup>2)</sup> For voltage suffix ▲ please consult the Product Selection Guide or the Industrial Control Catalog
- <sup>3)</sup> Rotary Operating Mechanism, Shaft and Handle to be ordered individually, please consult the Industrial Control Catalog
- <sup>4)</sup> These options to be ordered factory installed
- <sup>5)</sup> Shaft 300 mm included in Door Coupling Handle, for 500 mm replace 12 with 21
- <sup>6)</sup> Rating Plug required, please consult On-Line or Industrial Control Catalog
- <sup>7)</sup> Catalog-numbers ending with "E" refer to IEC rated breakers, for global certified types (UL and IEC) remove the E, e.g. 140M-I8E-D20
- <sup>8)</sup> Non Metallic Handle, IP 66, Cable length 1.8 meters. For different handle types and cable length, please consult On-Line or Industrial Control Catalog
- <sup>9)</sup> Rating dependent on configuration with Contactor and Overload Relay, refer to Coordination Tables
- <sup>10)</sup> Not compliant with IEC 60947-2, did comply with IEC 157-1
- <sup>11)</sup> For motors with increased starting current, use devices 140M-xyT-zzz (Short Current Trip Setting = 16...20 x le). For further information refer to technical documentation

## 1492-SP - Miniature Circuit Breakers

- Energy limiting, thermal magnetic overcurrent protectors
- Positively trip-free mechanism - breaker operation cannot be defeated by holding the handle in the ON position
- Field mountable accessories for select applications
- Commoning Links for easy, time saving parallel wiring of line side
- Supplementary Protector per UL/CSA definition
- Certifications: CE-marked, VDE, GL (Marine), UL recognized, CSA certified, CCC certification

## 1489-A - Circuit Breakers

- Industrial Circuit Breakers for North American Applications
- Comply with North American requirements for Branch Circuit Protection
- Field mountable accessories for select applications
- Commoning Links for easy, time saving parallel wiring of line side
- Miniature Circuit Breaker per IEC
- Certifications: UL listed, CSA certified, HACR, SWD, CE-marked, VDE

# 1492-RCD - Residual Current Devices

- Earth leakage detectors for IEC applications (not applicable in North America)
- Personnel protection 30 mA, installation protection 30...500 mA
- 1-phase types (L+N) and 3-phase types (3L or 3L+N)
- For use in association with 1492-SP, form fits with 1492-SP
- Commoning Links and Auxiliary/Alarm-Contacts identical as for 1492-SP
- Sensitiv for detecting AC and pulsating DC fault currents

Incoming Line Type		L + N	L1, L2, L3 or L1, L2, L3 +N	L1, L2, L3 or L1, L2, L3 +N

## 194E - Disconnect Switches

- Inductive Load Rated Switches; Current range 16...315 A
- Suitable as At-Motor-Disconnect Switch according UL508
- Positive-Guided Actuation
- Front/Door or Base/DIN-Rail Mounting Configurations
- Various Handles in Different Sizes, Colors, Lockable (padlock), Panel-Cutout
- Certifications: CE, UL listed, CSA certified, UL-File No. E14841

		Base mounting/DIN-Rail Mounting Switchbody		Front/Door mounting Switchbody		Enclosed with R/Y Actuator	
Typical Applications		Disconnect, Emergency Switch, Main Switch, Load Switch, Main Switch, Manual Motor Controller					At Site Motor Disconnect

# 194R - Disconnect Switches

- Inductive Load Rated Switches; Current range 25..400 A
- Non-Fused Version and Various Fuse Types complying with UL, CSA, DIN, BS, NFC provides worldwide acceptance
- Suitable as Service-Entrance-Disconnect Means according to UL 98
- Suitable as At-Motor-Disconnect Means according to UL508
- 4th pole extension up to 63 A switches
- 6 (8) auxiliary contacts can be added
- Certifications: CE, UL listed, CSA certified, UL-File No. E14841

3 pole Disconnect Switches

# Line-to-Load

## POWER SOLUTIONS

### Modules

The Line-to-Load program is part of our Components Education Series and consists of learning modules that provide you with valuable and unique "Power Solutions" from Rockwell Automation. These learning modules are designed to educate you on the latest industry solutions covering numerous facets of motor control and protection. The learning modules also focus on the solutions that lead to cost saving panel design techniques, wiring reduction, standards compliance, application specific solutions, technical reviews, new product advancements and global application considerations, just to name a few.

Contact your local Rockwell Automation Sales Office to find out more about the Line-to-Load Power Solutions Modules.

Rockwell Automation offers a breadth of quality Allen-Bradley® components to fit your specific needs. In order to assist you with your component selection, we offer a variety of configuration and selection tools.

#### Local Distributor

Call your local in-country representative.
