# Air Cylinder

Ø 20, Ø 25, Ø 32, Ø 40, Ø 50, Ø 63, Ø 80, Ø 100

(RoHS)

Female rod end available as standard

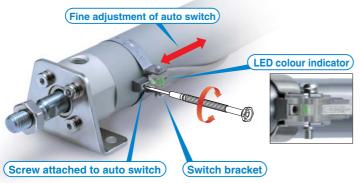

Rod end styles suitable for the application can be selected.

# Easy fine adjustment of auto switch position

Fine adjustment of the auto switch position is possible by simply loosening the screw attached to the auto switch.

**Transparent switch bracket improves** visibility of indicator LED.

No trunnion mounting female thread added to basic type variation

No foreign matter accumulation due to the simple construction

New Direct mount, non-rotating rod type (CG1KR-Z) is added. The models with rod end bracket and/or-

CG1-Z (Single acting), CG1K-Z, CG1R-Z, CG1KR-Z, CG1Y-Z

CAT.EUS20-224C-UK

# Part numbers with rod end bracket and/or pivot bracket available

Not necessary to order a bracket for the applicable cylinder separately Note) Mounting bracket is shipped together with the product, but not assembled

# Example) CDG1 D N20-50Z- N W -M9BW Mounting

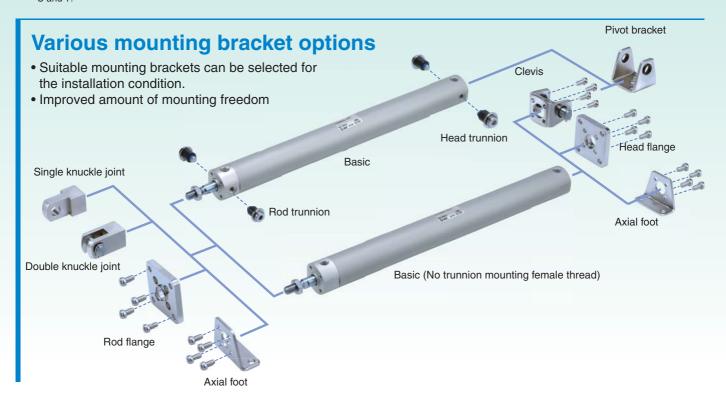

Pivot bracket							
_	None						
N	Pivot bracket is shipped together with the product, but not assembled.						

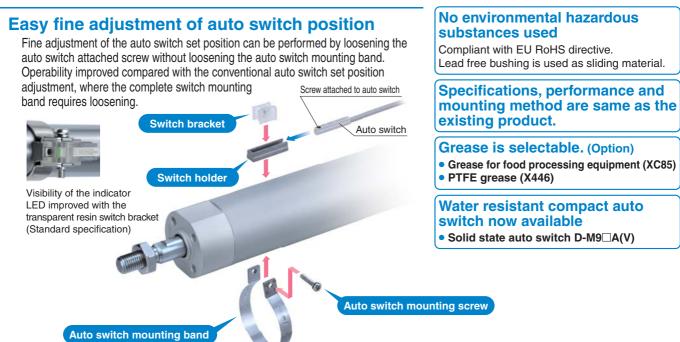

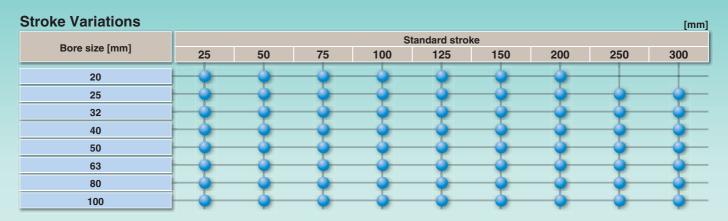

Rod e	Rod end bracket								
_	None								
V	Single knuckle joint								
W	Double knuckle joint

## **Specifications**

opecinications -					
Bore size [mm]	20, 25, 32, 40, 50, 63				
Action	Double acting				
Fluid	Air  re 1.0 MPa  re 0.05 MPa  50 to 750 mm/s  Rubber bumper				
Maximum operating pressure	1.0 MPa				
Minimum operating pressure	0.05 MPa				
Piston speed	50 to 750 mm/s				
Cushion	Rubber bumper				
Mounting	Basic, Axial foot, Rod flange, Head flange, Rod trunnion, Head trunnion, Clevis (used for changing the port location by 90°)				

- \* Auto switch can be mounted.
- \* Female rod end is not available.
- \* Use the existing seal kit.

# Applicable Tubing O.D./LD

Applicable Tubiling O.D./I.D.									
Bore size [mm]	20	25	32	40	50	63			
Applicable tubing O.D. [mm]	6/4	6/4	6/4	8/6	10 / 7.5	10 / 7.5			
	Can be used for either nylon, soft nylon or polyurethane tubing.								

# **Clean Series**

Type (Cushion) 10-CG1 | Mounting style Bore size Stroke Z

Clean Series (With relief port)

The type which is applicable for using inside the clean room graded Class 100 by making an actuator's rod section a double seal construction and discharging by relief port directly to the outside of clean room.

#### Specifications

Specifications						
Bore size [mm]	20, 25, 32, 40, 50, 63, 80, 100					
Action	Double acting					
Fluid	Air					
Maximum operating pressure	1.0 MPa					
Minimum operating pressure	0.05 MPa					
Cushion	Rubber bumper, Air cushion					
Piston speed	30 to 400 mm/s					
Relief port size	M5 x 0.8					
Mounting	Basic, Axial foot, Rod flange, Head flange**					

- \* Auto switch can be mounted.
- \*\* The basic type is B type only. However, no trunnion mounting female thread is provided.

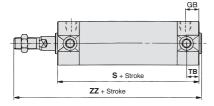

# Air-hydro

Low pressure hydraulic cylinder of 1.0 MPa or less

When using together with the CC series air-hydro unit, constant and low speed actuation and intermediate stopping similar to hydraulic units are possible with the use of valves and other pneumatic equipment.

**Dimensions** (Dimensions other than those shown below are the same as the standard type.)

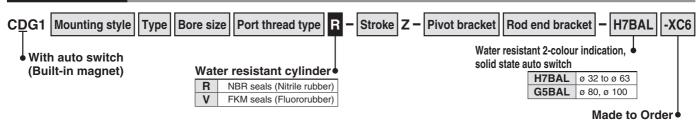

Bore size [mm]	GB	ТВ	s	ZZ
20	12	11	77	114
25	12	11	77	119
32	12	11	79	121
40	13	12	87	139
50	14	13	102	162
63	14	13	102	162

## **Specifications**

Specifications						
Bore size [mm]	20, 25, 32, 40, 50, 63					
Action	Double acting					
Fluid	Turbine oil					
Proof pressure	1.5 MPa					
Maximum operating pressure	1.0 MPa					
Minimum operating pressure	0.18 MPa					
Piston speed	15 to 300 mm/s					
Cushion	Rubber bumper (Standard equipment)					
Ambient and fluid temperature	5 to 60 °C					
Mounting	Basic, Axial foot, Rod flange, Head flange, Rod trunnion, Head trunnion, Clevis (used for changing the port location by 90°)					

<sup>\*</sup> Auto switch can be mounted.

# **Water Resistant**

# ♠ Caution

Since the scraper is press-fit into the rod cover, it cannot be replaced.

Applicable for use in an environment with water splashing such as food processing and car wash equipment, etc.

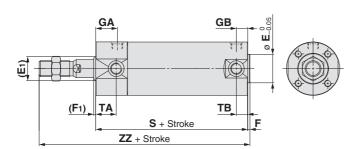

#### **Specifications**

32, 40, 50, 63, 80, 100		
Double acting, Single rod		
Rubber bumper/Air cushion		
Band mounting type		
XC6: Made of stainless steel		

<sup>\*</sup> Specifications other than above are the same as standard type.

# **Dimensions** (Dimensions other than those shown below are the same as the standard type.)

# **Specifications**

Bore size [mm]	20, 25, 32, 40, 50, 63, 80, 100				
Action	Double acting, Single rod				
Minimum operating pressure	0.1 MPa				
Cushion	Rubber bumper				

\* Specifications other than the above are the same as the standard type.

**Dimensions** (Dimensions other than those shown below are the same as the standard type.)

\* No trunnion mounting female thread is provided on the rod side. (For B: Basic)

					[mini
Bore size	GA	Р	Bore size	GA	P
20	14	M5 x 0.8	50	(14)	(Rc 1/4)
25	13	M5 x 0.8	63	(14)	(Rc 1/4)
32	(12)	(Rc 1/8)	80	(20)	(Rc 3/8)
40	(13)	(Rc 1/8)	100	(20)	(Rc 1/2)

- \* When female thread is used, use a washer, etc. to prevent the contact part at the rod end from being deformed depending on the material of the workpiece.
- (): Same as the standard model.
- \* The mounting dimensions of the mounting bracket are the same as the standard type.

# **Precautions**

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website,

http://www.smc.eu

## Handling

# **⚠** Warning

- 1. Do not operate the cushion valve in the fully closed or fully opened state. Using it in the fully closed state will cause the cushion seal to be damaged. Using it in the fully opened state will cause the piston rod assembly or the cover to be damaged.
- 2. Do not turn the cushion valve the number of rotations shown below or more from its fully closed state. If it is turned the number of rotations shown below or more, the cushion valve may come off and jump out by the air pressure, causing a hazard.

Bore size [mm]	Rotations	Hexagon wrench nominal size
20	2	1.5
25	3	1.5
32	4	1.5
40	5	1.5
50	3	3
63	4.5	3
80	5	4
100	5	4

- 3. Operate within the specified cylinder speed and kinetic energy. Otherwise, cylinder and seal damage may occur.
- 4. Use caution regarding the cushion performance in the low-speed range. There may be individual performance and effect variances when used near 50 mm/ s. Please consult with SMC about usage.

- 5. When a cylinder is operated with one end fixed and other free (basic, flange types), a bending moment may act on the cylinder due to the vibration generated at the stroke end, which can damage the cylinder. In such a case, install a mounting bracket to suppress the vibration of the cylinder body or reduce the piston speed so that the cylinder does not vibrate. Also, use a mounting bracket to suppress vibrations when moving the cylinder body or when a cylinder is operated horizontally and fixed at one end at a high speed and frequency.
- 6. Do not apply excessive lateral load to the piston rod.

Easy checking method

Minimum operating pressure after the cylinder is mounted to the equipment [MPa] = Minimum operating pressure of cylinder [MPa] + {Load weight [kg] x 9.8 x Friction coefficient of guide/Sectional area of cylinder [mm<sup>2</sup>]}

If smooth operation is confirmed within the above value, the load on the cylinder is the resistance of the thrust only and it can be judged as having no lateral load.

# 

1. Do not use the air cylinder as an air-hydro cylinder.

This may result in oil leak.

2. Install a rod boot without twisting. If the cylinder is installed with its bellows twisted, it could damage the bellows.

- 3. Tighten clevis bracket mounting bolts with the following proper tightening torque.
  - ø 20: 1.5 N·m, ø 25 to 32: 2.9 N·m,
  - ø 40: 4.9 N·m,
- ø 50: 11.8 N·m, ø 63 to 80: 24.5 N·m,
- ø 100: 42.2 N·m

# Disassembly/Replacement

#### 

1. Do not replace the bushings.

The bushings are press-fit. To replace them, they must be replaced together with the cover assembly.

2. To replace a seal, apply grease to the new seal before installing it.

If the cylinder is put into operation without applying grease to the seal, it could cause the seal to wear significantly, leading to premature air leakage.

3. Cylinders with ø 50 or larger bore sizes cannot be disassembled.

When disassembling cylinders with bore sizes of ø 20 through ø 40, grip the double flat part of either the tube cover or the rod cover with a vise and loosen the other side with a wrench or a monkey wrench etc., and then remove the cover. When retightening, tighten approximately 2 degrees more than the original position. (Cylinders with ø 50 or larger bore sizes are tightened with a large tightening torque and cannot be disassembled. If disassembly is required, please contact SMC.)

<sup>\*\*</sup> Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please consult with SMC regarding water resistant types with the above model numbers.

\* Lead wire length symbols: 0.5 m------ (Example) M9NW

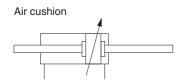

- \* Solid state auto switches marked with "O" are produced upon receipt of order.
- \* For details about auto switches with pre-wired connector, refer to Auto Switch Guide.
- \* The D-A9 🗆 M9 🗆 auto switches are shipped together, (but not assembled). (However, only the auto switch mounting brackets are assembled before shipment.)

# Made to Order

#### **Symbol**

Rubber bumper

# Made to Order

# Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications
-XA□	Change of rod end shape
-XB6	Heat resistant cylinder (-10 to 150 °C)*1
-XB7	Cold resistant cylinder (-40 to 70 °C)*2
-XC6	Made of stainless steel
-XC13	Auto switch rail mounting
-XC22	Fluororubber seal*1
-XC37	Larger throttle diameter of connection port
-XC85	Grease for food processing equipment

- \*1 Cylinders with rubber bumper have no bumper.
- \*2 Only compatible with cylinders with rubber bumper, but has no bumper.

# **Rod Boot Material**

Symbol	Rod boot material	Maximum operating temperature
J	Nylon tarpaulin	70 °C
K	Heat resistant tarpaulin	110 °C*

Maximum ambient temperature for the rod boot itself

Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

# **Specifications**

Bore	size [mm	1]	20	25	32	40	50	63	80	100		
Action			Double acting, Double rod									
Lubricant				Not required (Non-lube)								
Fluid						Α	ir					
Proof press	sure					1.5 l	МРа					
Maximum o	perating	pressure				1.0	МРа					
Minimum o	perating p	ressure				0.08	MPa					
Ambient an temperature				Without auto switch: –10 °C to 70 °C (No freezing) With auto switch : –10 °C to 60 °C								
Piston spec	ed			50 to 1000 mm/s 50 to 700 mm/s								
Stroke leng	th tolera	nce		Up to	1000 st	<sup>+1.4</sup> mm,	Up to 1	500 st <sup>+</sup>	1.8 0 mm			
Cushion					Rubbe	er bump	er, Air cı	ıshion				
Mounting**	¢		Basic, Basic (without trunnion mounting female thread), Axial foot, Flange, Trunnion									
	Rubber	Male rod end	0.28	0.41	0.66	1.20	2.00	3.40	5.90	9.90		
Allowable kinetic	bumper	0.11	0.18	0.29	0.52	0.91	1.54	2.71	4.54			
energy (J)	Air	Male rod end	R: 0.35 H: 0.42	R: 0.56 H: 0.65	0.91	1.80	3.40	4.90	11.80	16.70		
	cushion	Female rod end	0.11	0.18	0.29	0.52	0.91	1.54	2.71	4.54		

- \* R: Rod side, H: Head side
- \*\* Rod trunnion type is not available for ø 80 and ø 100.

Foot and flange types of cylinder sizes from  $\emptyset$  20 to  $\emptyset$  63 do not have trunnion mounting female thread. Operate the cylinder within the allowable kinetic energy.

# **Accessories**

	NA 11	ъ.	A : 16 .	D 10	Б
	Mounting	Basic	Axial foot	Rod flange	Rod trunnion
Standard	Rod end nut	•	•	•	•
	Single knuckle joint	•	•	•	•
Option	Double knuckle joint** (with pin)	•	•	•	•
	Pivot bracket*	_	_	_	•*
	Rod boot	•	•	•	•

- $\ast$  Not available for ø 80 and ø 100.
- \*\* A double knuckle joint pin and retaining rings are shipped together.

# **Standard Strokes**

Bore size [mm]	Standard stroke [mm] Note1)	Maximum manufacturable stroke [mm] Note 2)
20	25, 50, 75, 100, 125, 150, 200	201 to 1500
25		
32		
40	25, 50, 75, 100, 125,	201 to 1500
50, 63	150, 200, 250, 300	301 to 1500
80		
100		

- Note 1) Intermediate strokes not listed above are produced upon receipt of order. Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.)
- Note 2) The maximum manufacturable stroke shows the long stroke.
- Note 3) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection". In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to the deflection etc.

# Series CG1W

Note) Order two foots per cylinder.

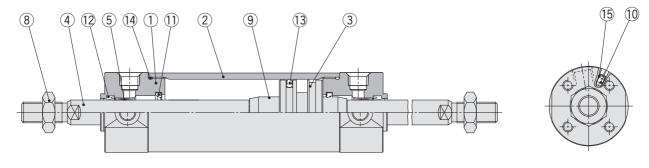

Direct Mount, Non-rotating Rod

Made to Order

# Construction

#### With air cushion

# **Component Parts**

No.	Descript	ion	Material	Note
1	Rod cover		Aluminium alloy	Hard anodised
2	Cylinder tube		Aluminium alloy	Hard anodised
3	Piston		Aluminium alloy	
4	Piston rod		Stainless steel	For ø 20 or ø 25 with built-in magnet
-4	Pistoli iou		Carbon steel*	Hard chrome plating*
5	Bushing		Bearing alloy	
6	Bumper		Resin	ø 32 or larger is common.
7	Bumper		Resin	Ø 32 of larger is confinion.
8	Rod end nut		Carbon steel	Zinc chromated
9	Cushion ring		Aluminium alloy	
10	Cushion valve	ø 40 or smaller	Carbon steel	Electroless nickel plating
10	Cusilion valve	ø 50 or larger	Steel wire	Zinc chromated
11	Cushion seal		Urethane	
12	Rod seal		NBR	
13	Piston seal		NBR	
14	Tube gasket		NBR	
15	Valve seal		NBR	

Note) For cylinders with auto switches, the magnet is installed in the piston.

# **Replacement Parts: Seal Kit**

Bore size [mm]	Kit no.	Contents
20	CG1WN20Z-PS	0
25	CG1WN25Z-PS	Set of the
32	CG1WN32Z-PS	nos. (12), (13), (14)
40	CG1WN40Z-PS	12, 13, 13

Note) Refer to the Specific Product Precautions on page 10 for Disassembly/Replacement.
Order with the kit number according to the bore size.

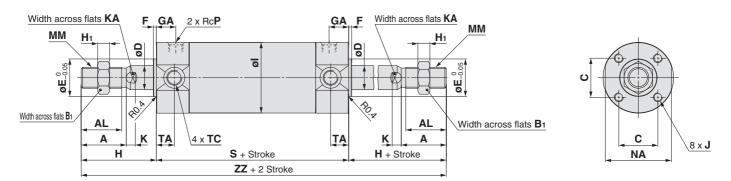

\* The seal kit includes a grease pack (10 g). Order with the following part number when only the grease pack is needed.

Grease pack part number: GR-S-010 (10 g)

 $<sup>\</sup>ast$  The material for ø 20, ø 25 cylinders with auto switches is made of stainless steel.

- \*\* Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please consult with SMC regarding water resistant types with the above model numbers.
- \* Lead wire length symbols: 0.5 m------ (Example) M9NW

1 m----- M (Example) M9NWM

- 3 m----- L (Example) M9NWL 5 m----- Z (Example) M9NWZ None----- N (Example) H7CN
- \* Solid state auto switches marked with "O" are produced upon receipt of order.
- \* Since there are other applicable auto switches than listed above, refer to page 74 for details. \* For details about auto switches with pre-wired connector, refer to the **Auto Switches Guide**.
- \* The D-A9 🗆 M9 🗆 auto switches are shipped together, (but not assembled). (However, only the auto switch mounting brackets are assembled before shipment.)

# Spring return Spring extend

#### **Symbol**

Spring return, Rubber bumper

Spring extend, Rubber bumper

#### Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications
-XC6	Made of stainless steel*1
-XC20	Head cover axial port*2
-XC27	Double clevis and double knuckle joint pins made of stainless steel
-XC29	Double knuckle joint with spring pin*1
-XC85	Grease for food processing equipment

- \*1 Applicable only to single acting, spring return type. For single acting, spring extend type, please contact SMC.
- \*2 Only compatible with cylinders with rubber bumper.

Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

# **A** Precautions

Be sure to read this before handling.
Refer to the back cover for Safety
Instructions. For Actuator and Auto
Switch Precautions, refer to "Handling
Precautions for SMC Products" and
the Operation Manual on SMC website,
http://www.smc.eu

Refer to page 10 for Handling and Disassembly/ Replacement.

## Air Cylinder: Non-rotating Rod Type **Double Acting**

# Series CG1K

ø 20, ø 25, ø 32, ø 40, ø 50, ø 63

#### How to Order

Male rod end

Female rod end

\* Solid state auto switches marked with "O" are produced upon receipt of order.

#### **Built-in Magnet Cylinder Model**

If a built-in magnet cylinder without an auto switch is required. there is no need to enter the symbol for the auto switch. (Example) CDG1KFA32-100Z

\* Since there are other applicable auto switches than listed above, refer to page 74 for details. \* For details about auto switches with pre-wired connector, refer to the Auto Switch Guide.

5

Made to Order

For details, refer to page 39.

Direct Mount

**Auto Switch** 

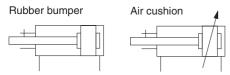

Made to Order

<sup>\*</sup> The D-A9 \( \subseteq \textit{/M9} \( \subseteq \subseteq \) auto switches are shipped together, (but not assembled). (However, only the auto switch mounting brackets are assembled before shipment.)

## Series CG1K

#### **Symbol**

#### Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications
-XA□	Change of rod end shape
-XC8	Adjustable stroke cylinder/Adjustable extension type*1
-XC9	Adjustable stroke cylinder/Adjustable retraction type*1
-XC10	Dual stroke cylinder/Double rod type
-XC11	Dual stroke cylinder/Single rod type*1
-XC12	Tandem cylinder*1, *2
-XC13	Auto switch rail mounting*1
-XC20	Head cover axial port*1
-XC27	Double clevis and double knuckle joint pins made of stainless steel

- \*1 Only compatible with cylinders with rubber bumper.
- \*2 The shape is the same as the existing product.
  Use the existing seal kit.

Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

 $<sup>\</sup>ast$  A double knuckle joint pin and retaining rings are shipped together.

#### **Standard Strokes**

		[mm]
Bore size	Standard stroke Note 1)	Maximum manufacturable stroke Note 2)
20	25, 50, 75, 100, 125, 150, 200	201 to 1500
25		
32	25 50 75 100 125 150 200 250 200	301 to 1500
40	25, 50, 75, 100, 125, 150, 200, 250, 300	301 10 1500
50, 63		

Note 1) Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.)

Note 2) The maximum manufacturable stroke shows the long stroke.

Note 3) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection". In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to the deflection etc.

#### **Ordering Example of Cylinder Assembly**

## Precautions

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, http://www.smc.eu

Caution on handling/disassembly is provided in addition to that shown below. Refer to page 10.

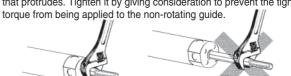

#### Handling/Disassembly

#### 

- 1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.
- If rotational torque is applied, the non-rotating guide will become deformed, thus affecting the non-rotating accuracy. Refer to the table below for the

approximate values of the	e allowable fai	ige of folations	ai torque.
Allowable rotational torque	ø <b>20</b>	ø <b>25</b> , ø <b>32</b>	ø 40, ø 50, ø 63
(N⋅m or less)	0.2	0.25	0.44

• To screw a bracket or a nut onto the piston rod, make sure to retract the piston rod entirely, and place a wrench over the flat portion of the rod that protrudes. Tighten it by giving consideration to prevent the tightening

2. When replacing rod seals, please contact SMC.

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

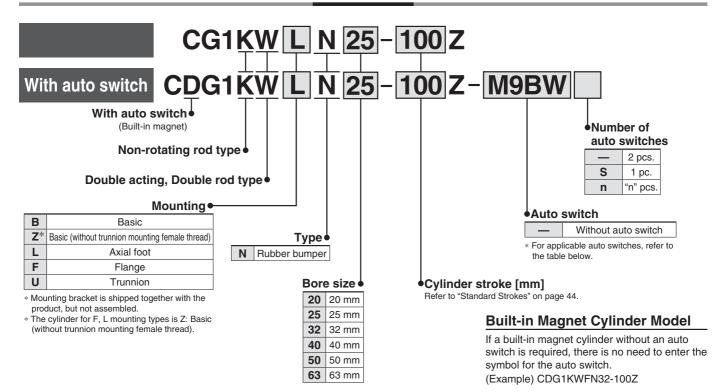

# Air Cylinder: Non-rotating Rod Type Double Acting, Double Rod

- \*\* Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please consult with SMC regarding water resistant types with the above model numbers.
- $\ast$  Solid state auto switches marked with "O" are produced upon receipt of order.
- $None \\ \hbox{$\cdots$} \quad N \quad \hbox{$(Example)$ H7CN} \\ \hbox{$\ast$ Since there are other applicable auto switches than listed above, refer to page 74 for details.}$
- \* For details about auto switches with pre-wired connector, refer to the Auto Switch Guide.
- \* The D-A9 🗆 M9 🗆 auto switches are shipped together, (but not assembled). (However, only the auto switch mounting brackets are assembled before shipment.)

#### **Symbol**

Rubber bumper

Refer to pages 68 to 74 for cylinders with

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- · Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- · Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

#### **Specifications**

Bore size [mm]	20	25	32	40	50	63				
Action	Double acting, Double rod									
Lubricant		1	Not required	d (Non-lube	e)					
Fluid			А	ir						
Proof pressure			1.5	MPa						
Maximum operating pressure			1.0	MPa						
Minimum operating pressure			0.08	MPa						
Ambient and fluid temperature	Wit Wit	thout auto th auto swi	switch: -10 tch : -10	°C to 70 °	C (No free:	zing)				
Piston speed			50 to 50	00 mm/s						
Stroke length tolerance	-	Up to 1000	st <sup>+1.4</sup> mm,	Up to 150	0 st <sup>+1.8</sup> mn	ı				
Cushion			Rubber	bumper						
Rod non-rotating accuracy Note)	±	1°	±0.8°		±0.5°					
Mounting		Basic, Basic (without trunnion mounting female thread), Axial foot, Flange, Trunnion								

<sup>\*</sup> Foot and flange types of cylinder sizes from ø 20 to ø 63 do not have trunnion mounting female thread. Operate the cylinder within the allowable kinetic energy. Refer to page 24 for details. Note) The values are for standard strokes.

#### **Accessories**

	Mounting	Basic	Axial foot	Flange	Trunnion
Standard	Rod end nut	•	•	•	•
	Single knuckle joint	•	•	•	•
Option	Double knuckle joint (with pin)*	•	•	•	•
	Pivot bracket	_	_	_	•

<sup>\*</sup> A double knuckle joint pin and retaining rings are shipped together.

#### Weights

							[kg]
	Bore size [mm]	20	25	32	40	50	63
ght	Basic	0.13	0.22	0.33	0.55	1.02	1.37
weight	Axial foot	0.24	0.35	0.49	0.77	1.50	2.09

Note) Order two foots per cylinder.

## Series CG1KW

#### Construction

#### **Component Parts**

0011	iiponeni Paris		
No.	Description	Material	Note
1	Rod cover A	Aluminium alloy	Hard anodised
2	Rod cover B	Aluminium alloy	Hard anodised
3	Cylinder tube	Aluminium alloy	Hard anodised
4	Piston	Aluminium alloy	
5	Piston rod A	Stainless steel	ø 32 or smaller
э	Piston rod A	Carbon steel*	Hard chrome plating* ø 40 or larger
6	Piston rod B	Stainless steel	For ø 20 or ø 25 with built-in magnet
	Pistoli fod B	Carbon steel**	Hard chrome plating*
7	Non-rotating guide	Bearing alloy	
8	Bushing	Bearing alloy	
9	Bumper	Resin	
10	Rod end nut	Carbon steel	Zinc chromated
11	Rod seal A	NBR	
12	Rod seal B	NBR	
13	Piston seal	NBR	
14	Tube gasket	NBR	

- \* The material is stainless steel for ø 20 to ø 32.
- \*\* The material for ø 20, ø 25 cylinders with auto switches is made of stainless steel.
- \*\*\* For cylinders with auto switches, the magnet is installed in the piston.

#### **Replacement Parts: Seal Kit**

Bore size [mm]	Kit no.	Contents
20	CG1KWN20Z-PS	0
25	CG1KWN25Z-PS	Set of the
32	CG1KWN32Z-PS	nos. (11), (12), (13), (14)
40	CG1KWN40Z-PS	

Note) Refer to the Specific Product Precautions on page 10 for Disassembly/Replacement.

Order with the kit number according to the bore size.

\* The seal kit includes a grease pack (10 g).
Order with the following part number when only the grease pack is needed.

Grease pack part number: GR-S-010 (10 g)

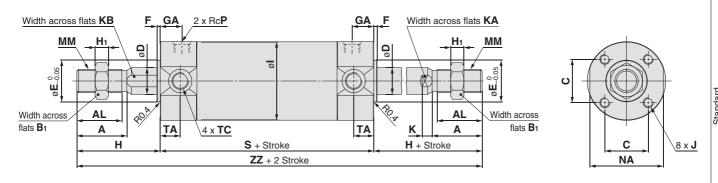

[mm]

Direct Mount, Non-rotating Rod

With End Lock

## **⚠ Precautions**

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website,

http://www.smc.eu

\* Caution on handling/disassembly is provided in addition to that shown below. Refer to page 10.

#### Handling/Disassembly

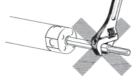

#### **⚠** Caution

- Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.
- If rotational torque is applied, the non-rotating guide will become deformed, thus affecting the non-rotating accuracy. Refer to the table below for the approximate values of the allowable range of rotational torque.

Allowable rotational torque	ø <b>20</b>	ø <b>25</b> , ø <b>32</b>	ø 40, ø 50, ø 63
(N⋅m or less)	0.2	0.25	0.44

• To screw a bracket or a nut onto the piston rod, make sure to retract the piston rod entirely, and place a wrench over the flat portion of the rod that protrudes. Tighten it by giving consideration to prevent the tightening torque from being applied to the nonrotating guide.

#### 2. When replacing rod seals, please contact SMC.

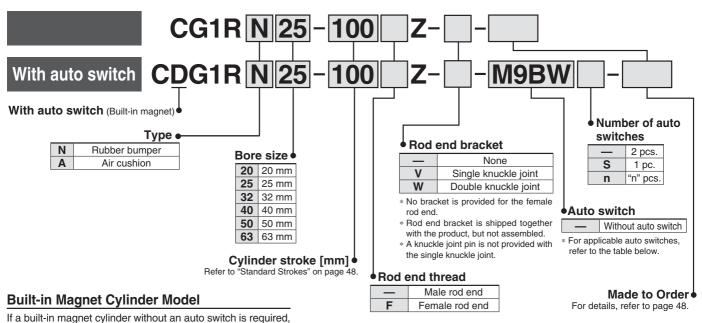

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

## **Air Cylinder: Direct Mount Type Double Acting**

# Series CG1R

ø 20, ø 25, ø 32, ø 40, ø 50, ø 63

#### **How to Order**

there is no need to enter the symbol for the auto switch. (Example) CDG1RA32-100Z

Applicable Auto Switches/Refer to the Auto Switch Guide for further information on auto switches.

- \*\* Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please consult with SMC regarding water resistant types with the above model numbers.
- \* Lead wire length symbols: 0.5 m------ (Example) M9NW
  - 1 m····· M (Example) M9NWM
  - 3 m····· L (Example) M9NWL
  - 5 m····· Z (Example) M9NWZ None N (Example) H7CN
- \* Since there are other applicable auto switches than listed above, refer to page 74 for details.
- \* For details about auto switches with pre-wired connector, refer to the Auto Switch Guide.
- \* The D-A9 🗆 M9 🗆 auto switches are shipped together, (but not assembled). (However, only the auto switch mounting brackets are assembled before shipment.)

\* Solid state auto switches marked with "O" are produced upon receipt of order.

# The CG1R direct mount cylinder can be installed directly through the use of a square rod cover.

#### Space-saving has been realized.

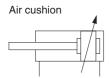

Because it is a directly mounted style without using brackets, its overall length is shorter, and its installation pitch can be made smaller. Thus, the space that is required for installation has been dramatically reduced.

#### **Symbol**

#### Rubber bumper

#### Made to Order

#### Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications						
-XA□	Change of rod end shape						
-XB6	Heat resistant cylinder (-10 to 150 °C)*2						
-XB7	Cold resistant cylinder (-40 to 70 °C)*1, *3						
-XB9 Low speed cylinder (10 to 50 mm/s)							
-XB13	Low speed cylinder (5 to 50 mm/s)*1, *3						
-XC6	Made of stainless steel						
-XC8	Adjustable stroke cylinder/Adjustable extension type*1						
-XC9	Adjustable stroke cylinder/Adjustable retraction type*1						
-XC13	Auto switch rail mounting*1						
-XC20	Head cover axial port*1						
-XC22	Fluororubber seal						
-XC85	Grease for food processing equipment						

- \*1 Only compatible with cylinders with rubber bumper.
- \*2 Cylinders with rubber bumper have no bumper.
- \*3 The shape is the same as the existing product. Use the existing seal kit.

## Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

#### **Specifications**

Bore size [mm]	20	25	32	40	50	63			
Action		D	ouble actin	g, Single r	od				
Lubricant	Not required (Non-lube)								
Fluid	Air								
Proof pressure	1.5 MPa								
Maximum operating pressure	1.0 MPa								
Minimum operating pressure	0.05 MPa								
Ambient and fluid temperature	Without auto switch: -10 °C to 70 °C (No freezing) With auto switch : -10 °C to 60 °C								
Piston speed	50 to 1000 mm/s								
Stroke length tolerance	Up to 300 st +1.4 mm								
Cushion	Rubber bumper, Air cushion								

#### **Standard Strokes**

	[mm]				
Bore size	Standard stroke*				
20	<b>20</b> 25, 50, 75, 100, 125, 150				
25, 32	25, 50, 75, 100, 125, 150, 200				
40, 50, 63	25, 50, 75, 100, 125, 150, 200, 250, 300				

 $* \ {\it Please consult with SMC for strokes which exceed the standard stroke length.} \\$ 

Note 1) Intermediate strokes not listed above are produced upon receipt of order.

Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.)

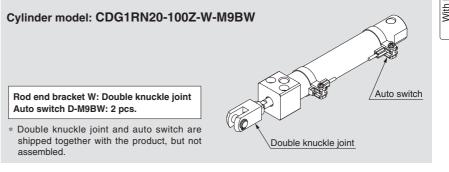

Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air

Cylinders Model Selection". In addition, the products that exceed the standard stroke
might not be able to fulfill the specifications due to the deflection etc.

#### **Tightening Torque**: Tighten the cylinder mounting bolts with the following tightening torque.

Bore size [mm]	Hexagon socket head cap screw size	Tightening torque [N⋅m]
20	M5 x 0.8	2.4 to 3.6
25	M6	4.2 to 6.2
32	M8	10.0 to 15.0
40	M10	19.6 to 29.4
50	M12	33.6 to 50.4
63	M16	84.8 to 127.2

#### **Ordering Example of Cylinder Assembly**

## Series CG1R

#### Weights

						[Kg]
Bore size [mm]	20	25	32	40	50	63
Basic weight	0.14	0.23	0.35	0.57	1.04	1.49
Single knuckle joint	0.05	0.09	0.09	0.10	0.22	0.22
Double knuckle joint (with pin)	0.05	0.09	0.09	0.13	0.26	0.26
Additional weight per 50 mm of stroke	0.05	0.07	0.09	0.14	0.21	0.25
Additional weight with air cushion	0	0.01	0.04	0	0.01	0.04
Weight reduction for female rod end	-0.01	-0.02	-0.02	-0.05	-0.10	-0.10

Calculation (Example) CG1RN32-100Z

(ø 32, 100 stroke)

- Basic weight ..... 0.35
- Additional weight ...... 0.09/50 stroke
- Air cylinder stroke...... 100 stroke

 $0.35 + 0.09 \times 100/50 = 0.53 \text{ kg}$ 

#### **Accessories**

	Mounting	Basic
Standard	Rod end nut	•
	Single knuckle joint	•
Option	Double knuckle joint* (with pin)	•

<sup>\*</sup> A double knuckle joint pin and retaining rings are shipped together.

Be sure to read this before handling.

Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, http://www.smc.eu

\* Caution on handling/disassembly is provided in addition to that shown below. Refer to page 10.

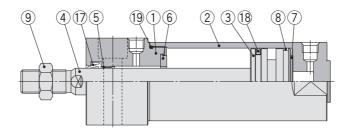

#### Handling/Disassembly

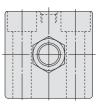

#### 

When a cylinder is operated with one end fixed and the other free, a bending moment may act on the cylinder due to vibration generated at the stroke end, which can damage the cylinder. In such a case, install a mounting bracket to suppress the vibration of the cylinder body or reduce the piston speed so that the cylinder does not vibrate. Also, use a mounting bracket when moving the cylinder body or when a long stroke cylinder is mounted horizontally and fixed at one end.

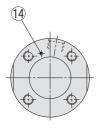

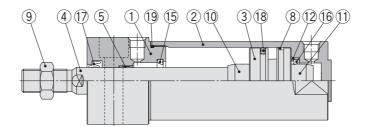

#### With rubber bumper

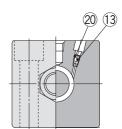

#### With air cushion

#### **Component Parts**

No.	Description	Material	Note
1	Rod cover	Aluminium alloy	Hard anodised
2	Tube cover	Aluminium alloy	Hard anodised
3	Piston	Aluminium alloy	
4	Piston rod	Stainless steel	For ø 20 or ø 25 with built-in magnet
4	PISION FOO	Carbon steel*	Hard chrome plating*
5	Bushing	Bearing alloy	
6	Bumper	Resin	ø 32 or larger is
7	Bumper	Resin	common.
8	Wear ring	Resin	
9	Rod end nut	Carbon steel	Zinc chromated
10	Cushion ring A	Aluminium alloy	

No.	Descri	ption	Material	Note

Direct Mount

With End Lock

Auto Switch

Made to Order

## Series CG1KR

Series CG1KR direct mount, non-rotating rod type cylinder can be installed directly through the use of a square rod cover.

#### Space-saving has been realized.

Because it is a directly mounted style without using brackets, its overall length is shorter, and its installation pitch can be made smaller. Thus, the space that is required for installation has been dramatically reduced.

#### Symbol Rubber bumper

#### Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications
-XC8	Adjustable stroke cylinder/Adjustable extension type*1
-XC9	Adjustable stroke cylinder/Adjustable retraction type*1
-XC20	Head cover axial port

<sup>\*1</sup> The shape is the same as the existing product. Use the existing seal kit.

#### **Accessories**

	Mounting							
Standard	•							
	Single knuckle joint	•						
Option	Double knuckle joint* (with pin)	•						

<sup>\*</sup> A double knuckle joint pin and retaining rings are shipped together.

Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting
- · Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

#### **Specifications**

Bore size [mm]	20	25	32	40	50	63						
Action	Double acting, Single rod											
Lubricant		N	lot required	d (Non-lube	e)							
Fluid			А	ir								
Proof pressure			1.5	MPa								
Maximum operating pressure			1.0	MPa								
Minimum operating pressure	0.05 MPa											
Ambient and fluid temperature	Wit Wit	thout auto s th auto swi	switch: –10 tch : –10	°C to 70 °C to 60 °C	C (No freez	zing)						
Piston speed	50 to 500 mm/s											
Stroke length tolerance	Up to 300 st <sup>+1.4</sup> mm											
Cushion	Rubber bumper											
Rod non-rotating accuracy	±	±1° ±0.8° ±0.5°										

#### Weights

						[kg]
Bore size [mm]	20	25	32	40	50	63
Basic weight	0.14	0.24	0.35	0.56	1.04	1.48
Single knuckle joint	0.05	0.09	0.09	0.10	0.22	0.22
Double knuckle joint (with pin)	0.05	0.09	0.09	0.13	0.26	0.26
Additional weight per 50 mm of stroke	0.05	0.07	0.09	0.15	0.22	0.26
Weight reduction for female rod end	-0.01	-0.02	-0.02	-0.05	-0.10	-0.10

Calculation (Example) CG1KRN32-100Z (ø 32, 100 stroke)

Additional weight ...... 0.09/50 stroke

• Air cylinder stroke ...... 100 stroke

 $0.35 + 0.09 \times 100/50 = 0.53 \text{ kg}$ 

#### Standard Strokes

	[mm]
Bore size	Standard stroke*
20	25, 50, 75, 100, 125, 150
25, 32	25, 50, 75, 100, 125, 150, 200
40, 50, 63	25, 50, 75, 100, 125, 150, 200, 250, 300

\* Please consult with SMC for strokes which exceed the standard stroke length.

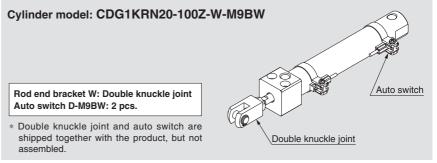

Note 1) Intermediate strokes not listed above are produced upon receipt of order.

Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.) Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection". In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to the deflection etc.

#### **Tightening Torque**: Tighten the cylinder mounting bolts with the following tightening torque.

Bore size [mm]	Hexagon socket head cap screw size	Tightening torque [N·m]
20	M5 x 0.8	2.4 to 3.6
25	M6	4.2 to 6.2
32	M8	10.0 to 15.0
40	M10	19.6 to 29.4
50	M12	33.6 to 50.4
63	M16	84.8 to 127.2

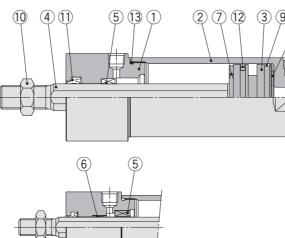

#### Ordering Example of Cylinder Assembly

#### Construction

#### Non-rotating rod type/ **Bottom mounting style**

ø 20 to ø 32

#### **Component Parts**

No.	Descriptio	n	Material	Note
1	Rod cover		Aluminium alloy	Clear hard anodised
2	Tube cover		Aluminium alloy	Clear hard anodised
3	Piston		Aluminium alloy	
4	Piston rod	ø 20 to ø 32	Stainless steel	
4	Piston rou	ø 40 to ø 63	Carbon steel	Hard chrome plating
5	Non-rotating guid	le	Oil-impregnated sintered alloy	
6	Bushing		Oil-impregnated sintered alloy	ø 20 to ø 32 only
7	Bumper		Resin	
8	Bumper		Resin	
9	Wear ring		Resin	
10	Rod end nut		Rolled steel	Zinc chromated
11	Rod seal		NBR	
12	Piston seal		NBR	
13	Tube gasket		NBR	

Replacement parts/Seal kit are the same as double acting, non-rotating rod type. Refer to page 41.

Note) Refer to the Specific Product Precautions on page 10 for Disassembly/Replacement.

## 

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch I Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website,

#### I http://www.smc.eu

#### Handling/Disassembly

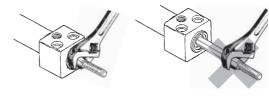

#### 

When a cylinder is operated with one end fixed and the other free, a bending moment may act on the cylinder due to vibration generated at the stroke end, which can damage the cylinder. In such a case, install a mounting bracket to suppress the vibration of the cylinder body or reduce the piston speed so that the cylinder does not vibrate. Also, use a mounting bracket when moving the cylinder body or when a long stroke cylinder is mounted horizontally and fixed at one end.

- 1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.
- If rotational torque is applied, the non-rotating guide will become deformed, thus affecting the non-rotating accuracy. Refer to the table below for the approximate values of the allowable range of rotational torque.

Allowable rotational torque	ø <b>20</b>	ø <b>25</b> , ø <b>32</b>	ø 40, ø 50, ø 63
(N⋅m or less)	0.2	0.25	0.44

• To screw a bracket or a nut onto the piston rod, make sure to retract the piston rod entirely, and place a wrench over the flat portion of the rod that protrudes. Tighten it by giving consideration to prevent the tightening torque from being applied to the non-rotating guide.

2. When replacing rod seals, please contact SMC.

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

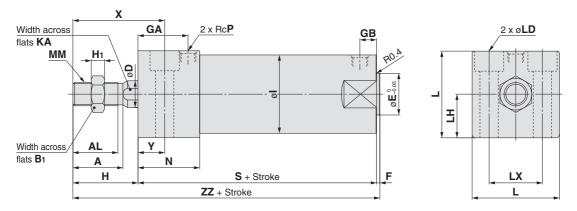

Made to Order

54

## Series CBG1

#### **Symbol**

Rubber bumper

Air cushion

#### Made to Order (For details, refer to pages 77 to 93.)

Symbol	Specifications						
-XA□	Change of rod end shape						
-XC13	Auto switch rail mounting						

Refer to pages 68 to 74 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range
- Cylinder mounting bracket, by stroke/ Auto switch mounting surfaces

#### **Specifications**

Bore size [mm]	20	25	32	40	50	63	80	100		
Action	Double acting, Single rod									
Lubricant			Not	required	d (Non-lu	ube)				
Fluid				Α	ir					
Proof pressure	1.5 MPa									
Maximum operating pressure				1.0	MРа					
Minimum operating pressure	0.15 MPa*									
Ambient and fluid temperature	Without auto switch: -10 to 70 °C (No freezing) With auto switch: -10 to 60 °C (No freezing)									
Piston speed			50 to 10	00 mm/s	3		50 to 700 mm/s			
Stroke length tolerance	11	n to 1000	st + 1.4 mm	Up to 12	00 st + 1.8 m		Up to 1000 st + 1.4 mm			
Stroke length tolerance	U	p to Tool	0 111111,	υριο 12	.00 0 111	1111	Up to 150	0 st + 1.8 mm		
Cushion	Rubber bumper, Air cushion									
Mounting **	Basic, Axial foot, Rod flange, Head flange, Rod trunnion, Head trunnion, Clevis (used for changing the port location by 90°)									

- \* 0.05 MPa except locking parts.
- \*\* Rod/Head trunnion types are not available for Ø 80 and Ø 100. Trunnion is not attached for a cover on which lock mechanism is equipped.

#### **Lock Specifications**

Lock position			Head (	end, Rod e	end, Doub	le end						
Holding force	ø 20	ø 25	ø 32	ø 40	ø 50	ø 63	ø 80	ø 100				
(Max.) [N]	215	330	550	860	1340	2140	3450	5390				
Backlash		2 mm or less										
Manual release			Non-l	ocking typ	e, Locking	type						

Adjust the switch position so that it operates upon movement to both the stroke end and backlash (2 mm) positions.

#### **Standard Strokes**

Bore size [mm]	Standard stroke [mm] Note 1)	Long stroke [mm]	Maximum manufacturable stroke [mm]
20	25, 50, 75, 100, 125, 150, 200	201 to 350	
25		301 to 400	
32		301 to 450	
40	25, 50, 75, 100, 125,	301 to 800	1500
50, 63	150, 200, 250, 300	301 to 1200	
80		301 to 1400	
100		301 to 1500	

Note 1) Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.)

Note 2) Note 2) Long stroke applies to the axial foot style and the rod side flange style. If other
mounting brackets are used, or the length exceeds the long stroke limit, the stroke should
be determined based on the stroke selection table in the technical data.

#### **Rod Boot Material**

Symbol	Rod boot material	Maximum operating temperature
J	Nylon tarpaulin	70 °C
K	Heat resistant tarpaulin	110 °C*

 Maximum ambient temperature for the rod boot itself.

	32	CBG1N32-PS-W	and grease pack	
	40	CBG1N40-PS-W	ana groado padic	

Order seal kit in accordance with the bore size. \* The seal kit includes a grease pack (10 g). Order with the following part number when only the grease pack is needed.

Grease pack part number: GR-S-010 (10 g)

#### **⚠** Caution

When disassembling cylinders with bore sizes of ø 20 through ø 40, grip the double flat part of either the tube cover or the rod cover with a vise and loosen the other side with a wrench or a monkey wrench etc., and then remove the cover. When re-tightening, tighten approximately 2 degrees more than the original position. (Cylinders with ø 50 or larger bore sizes are tightened with a large tightening torque and cannot be disassembled. If disassembly is required, please contact SMC.)

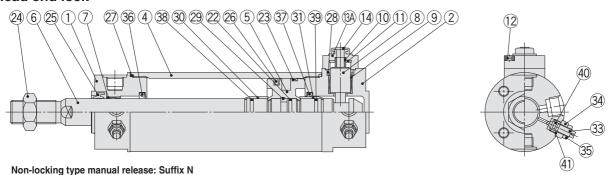

<sup>\*</sup> The material for ø 20, ø 25 cylinders with auto switches is made of stainless steel.

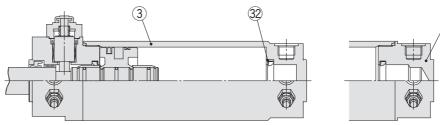

## Series CBG1

#### **Construction: With Air Cushion**

#### With air cushion Head end lock

Rod end lock

#### **Component Parts**

No.	Description	Material	Note
1	Rod cover	Aluminium alloy	Hard anodised
2	Head cover	Aluminium alloy	Hard anodised
3	Tube cover	Aluminium alloy	Hard anodised
4	Cylinder tube	Aluminium alloy	Hard anodised
5	Piston	Aluminium alloy	Chromated
6	Piston rod	Carbon steel*	Hard chrome plating*
7	Bushing	Bearing alloy	
8	Lock piston	Carbon steel	Hard chrome plating, Heat treated
9	Lock bushing	Copper alloy	
10	Lock spring	Stainless steel	
11	Bumper	Resin	
12	Hexagon socket head cap screw	Alloy steel	Black zinc chromated
13A	Cap A	Aluminium die-casted	Black painted
13B	Cap B	Carbon steel	Oxide film treated
14	Rubber cap	Synthetic rubber	
15	M/O knob	Zinc die-casted	Black painted
16	M/O bolt	Alloy steel	Black zinc chromated, Red painted
17	M/O spring	Steel wire	Zinc chromated
18	Stopper ring	Carbon steel	Zinc chromated
N			

Note) For cylinders with auto switches, the magnet is installed in the piston.

st The material for ø 20, ø 25 cylinders with auto switches is made of stainless steel.

## Series CBG1 Specific Product Precautions 1

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, http://www.smc.eu

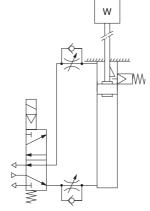

#### **Use the Recommended Pneumatic Circuit**

#### **△** Caution

 This is necessary for proper operation and release of the lock.

Head end lock

Rod end lock

Handling

#### **△** Caution

1. Do not use 3 position solenoid valves.

Avoid use in combination with 3 position solenoid valves (especially closed center metal seal types). If pressure is trapped in the port on the lock mechanism side, the cylinder cannot be locked. Furthermore, even after being locked, the lock may be released after some time, due to air leaking from the solenoid valve and entering the cylinder.

- 2. Back pressure is required when releasing the lock. Be sure air is supplied to the side of the cylinder without a lock mechanism, (side of the piston rod without lock for double end lock), before starting up, as in the above figures. Otherwise, the lock may not be released. (Refer to "Releasing the Lock".)
- **3.** Release the lock when mounting or adjusting the cylinder. If mounting or other work is performed when the cylinder is locked, the lock unit may be damaged.
- **4. Operate with a load ratio of 50 % or less.**If the load ratio exceeds 50 %, this may cause problems such as failure of the lock to release, or damage to the lock unit.
- 5. Do not operate multiple cylinders in synchronization. Avoid applications in which two or more cylinders with end lock are synchronized to move one workpiece, as one of the cylinder locks may not be able to release when required.
- Use a speed controller with meter-out control.
   Lock cannot be released occasionally by meter-in control.
- Be sure to operate completely to the cylinder stroke end on the side with the lock.

If the cylinder piston does not reach the end of the stroke, locking and unlocking may not be possible.

- 8. Do not use the air cylinder as an air-hydro cylinder. This may result in oil leak.
- 9. Install a rod boot without twisting.

If the cylinder is installed with its bellows twisted, it could damage the bellows.

 Adjust an auto switch position so that it operates for movement to both the stroke end and backlash (2 mm) positions.

When a 2-colour indication switch is adjusted for green indication at the stroke end, it may change to red for the backlash return, but this is not abnormal.

#### Handling

#### **△** Warning

1. Do not operate the cushion valve in the fully closed or fully opened state.

Using it in the fully closed state will cause the cushion seal to be damaged. Using it in the fully opened state will cause the piston rod assembly or the cover to be damaged.

2. Operate within the specified cylinder speed.

Otherwise, cylinder and seal damage may occur.

#### **Operating Pressure**

#### **∧** Caution

1. Supply air pressure of 0.15 MPa or higher to the port on the lock mechanism side, as it is necessary for releasing the lock.

#### **Exhaust Speed**

#### 

1. The lock will be engaged automatically if the pressure applied to the port on the lock mechanism side falls to 0.05 MPa or less. In cases where the piping on the lock mechanism side is long and thin, or the speed controller is separated at some distance from the cylinder port, the exhaust speed will be reduced. Take note that some time may be required for the lock to engage. In addition, clogging of a silencer mounted on the solenoid valve exhaust port can produce the same effect.

#### **Relation to Cushion**

#### **△** Caution

 When cushion valve at lock mechanism side is fully opened or closed, piston rod may not be reached at stroke end. Thus, lock is not established. And when locking is done at cushion valve fully closed, adjust cushion valve since lock may not be released.

#### Releasing the Lock

#### **∆** Warning

1. Before releasing the lock, be sure to supply air to the side without a lock mechanism, so that there is no load applied to the lock mechanism when it is released. (Refer to the recommended pneumatic circuits.) If the lock is released when the port on the other side is in an exhaust state, and with a load applied to the lock unit, the lock unit may be subjected to an excessive force and be damaged. Furthermore, sudden movement of the piston rod is very dangerous.

#### Disassembly/Replacement

#### **△** Caution

1. Do not replace the bushings.

The bushings are press-fit. To replace them, they must be replaced together with the cover assembly.

- 2. To replace a seal, apply grease to the new seal before installing it. If the cylinder is put into operation without applying grease to the seal, it could cause the seal to wear significantly, leading to premature air leakage.
- 3. Cylinders with Ø 50 or larger bore sizes cannot be disassembled. When disassembling cylinders with bore sizes of Ø 20 through Ø 40, grip the double flat part of either the tube cover or the rod cover with a vise and loosen the other side with a wrench or a monkey wrench etc., and then remove the cover. When re-tightening, tighten approximately 2 degrees more than the original position. (Cylinders with Ø 50 or larger bore sizes are tightened with a large tightening torque and cannot be disassembled. If disassembly is required, please contact SMC.)

# Series CBG1 Specific Product Precautions 2

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, http://www.smc.eu

#### **Manual Release**

#### **△** Caution

#### 1. Non-locking type manual release

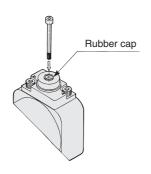

Insert the accessory bolt from the top of the rubber cap (it is not necessary to remove the rubber cap), and after screwing it into the lock piston, pull it to release the lock. If you stop pulling the bolt, the lock will return to an operational state.

Thread sizes, pulling forces and strokes are as shown below.

Bore size [mm]	Thread size	Pulling force	Stroke [mm]
20, 25, 32	M2.5 x 0.45 x 25 L or more	4.9 N	2
40, 50, 63	M3 x 0.5 x 30 L or more	10 N	3
80, 100	M5 x 0.8 x 40 L or more	24.5 N	3

Remove the bolt for normal operation.

It can cause lock malfunction or faulty release.

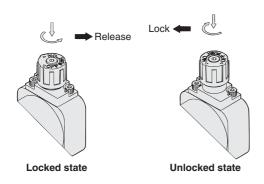

#### 2. Locking type manual release

While pushing the M/O knob, turn it 90° counterclockwise. The lock is released (and remains in a released state) by aligning the ▲mark on the cap with the ▼OFF mark on the M/O knob.

When locking is desired, turn the M/O knob  $90^{\circ}$  clockwise while pushing completely down, and align the  $\triangle$ mark on the cap with the  $\blacktriangledown$ ON mark on the M/O knob. The correct position is confirmed by a clicking sound.

Failure to click it into place properly can cause the lock to disengage.

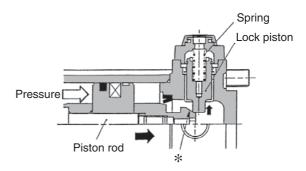

#### **Working Principle**

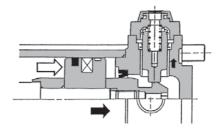

\* The figures below are the same as those for Series CBA2.

#### •Head end lock (Rod end lock is the same.)

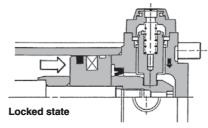

When the piston rod is getting closer to the stroke end, the taper part (\*)
of the piston rod edge will push the lock piston up.

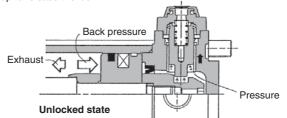

2. The lock piston is pushed up further.

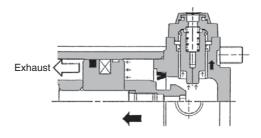

3. The lock piston is pushed up into the groove of the piston rod to lock it. (The lock piston is pushed up by spring force.) At this time, it is exhausted from the port on the head side and introduced into the atmosphere.

4. When pressure is supplied in the head side, lock piston will be pushed up to release the lock.

5. When the lock is released, the cylinder will move forward.

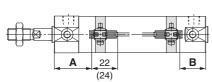

## Series CG1

## **Auto Switch Mounting**

#### Auto Switch Proper Mounting Position (Detection at Stroke End) and Its Mounting Height

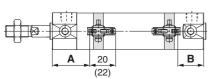

Solid state auto switch D-M9□/M9□W, D-M9□A Ø 20 to Ø 63

#### Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable. Refer to the Auto Switch Guide for the detailed specifications.

Туре	Model	Electrical entry	Features	Applicable bore size	
	D-H7A1, H7A2, H7B		_		
Solid state	D-H7NW, H7PW, H7BW		Diagnostic indication (2-colour indication)	ø 20 to ø 63	
Solid State	D-H7BA		Water resistant (2-colour indication)		
	D-G5NT	Grommet (In-line)	With timer	ø 20 to ø 100	
	D-C73, C76		_	ø 20 to ø 63	
Reed	D-C80		Without indicator light	Ø 20 t0 Ø 63	
	D-B53		_	ø 20 to ø 100	

<sup>\*</sup> With pre-wired connector is also available for solid state auto switches. For details, refer to the Auto Switch Guide.

<sup>\*</sup> Adjust the auto switch mounting angle according to the customer's application.

<sup>\*</sup> Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H) are also available. For details, refer to the Auto Switch Guide.

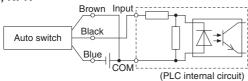

<sup>\*</sup> Wide range detection type, solid state auto switch (D-G5NB) is also available. For details, refer to the Auto Switch Guide.

# **Prior to Use Auto Switch Connection and Example**

#### **Sink Input Specifications**

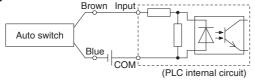

#### **Source Input Specifications**

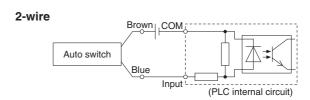

#### 3-wire, NPN

# 3-wire, PNP Brown Input Auto switch Blue COM (PLC internal circuit)

#### 2-wire

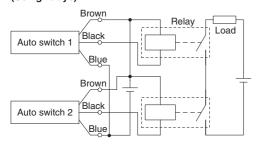

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

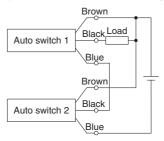

#### **Example of AND (Series) and OR (Parallel) Connection**

\* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid.

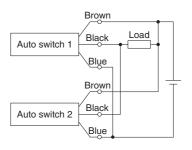

# 3-wire AND connection for NPN output (Using relays)

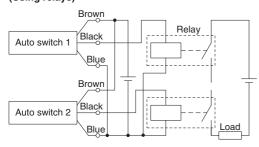

#### (Performed with auto switches only)

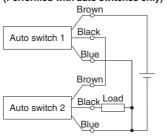

#### 3-wire OR connection for NPN output

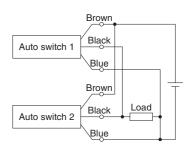

# 3-wire AND connection for PNP output (Using relays)

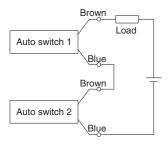

#### (Performed with auto switches only)

#### 3-wire OR connection for PNP output

#### 2-wire AND connection

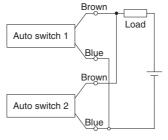

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state.

The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with load voltage less than 20 V cannot be used

Load voltage at ON = Power supply voltage –
Residual voltage x 2 pcs.
= 24 V - 4 V x 2 pcs.
= 16 V

Example: Power supply is 24 VDC Internal voltage drop in auto switch is 4 V.

#### 2-wire OR connection

(Solid state)
When two auto
switches are
connected in parallel,
malfunction may occur
because the load
voltage will increase
when in the OFF state

when in the OFF state.

Blue

Load voltage at OFF = Leakage current x 2 pcs. x

Load impedance = 1 mA x 2 pcs. x 3 k $\Omega$ 

Example: Load impedance is 3 k $\Omega$ . Leakage current from auto switch is 1 mA.

(Reed)
Because there is no current leakage, the load voltage will not increase when turned OFF.
However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "\*" will be as follows to the rod diameter (D). Enter any special dimension you desire.
- $D \leq 6 \rightarrow D-1 \text{ mm} \qquad 6 < D \leq 25 \rightarrow D-2 \text{ mm} \qquad D > 25 \rightarrow D-4 \text{ mm}$  3. In the case of double rod type and single acting retraction type, enter

the dimensions when the rod is retracted.

# Simple Specials Series CG1

# Series CG1 Made to Order

Please contact SMC for detailed dimensions, specifications and lead times.

# 1 Heat Resistant Cylinder (-10 to 150 °C)

Symbol -XB6

Air cylinder which changed the seal material and grease, so that it could be used even at higher temperature up to 150 from -10 °C.

#### **Applicable Series**

Description	Model	Action	Note
Standard type	CG1 Double acting, Single rod Except with auto swit		Except with auto switch.
Standard type	CG1W	Double acting, Double rod	Cylinders with rubber
Direct mount type	CG1R	Double acting, Single rod	bumper have no bumper.

- Note 1) Operate without lubrication from a pneumatic system lubricator.
- Note 2) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.
- Note 3) In principle, it is impossible to make built-in magnet type and the one with auto switch. But, as for the one with auto switch, and the heat resistant cylinder with heat resistant auto switch, please contact SMC.

#### Note 4) Piston speed is ranged from 50 to 500 mm/s.

#### **Specifications**

Ambient temperature range	−10 °C to 150 °C	
Seal material	Fluororubber	
Grease	Heat resistant grease	
Specifications other than above and external dimensions	Same as standard type	

#### **.**↑Warning

#### **Precautions**

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

#### **How to Order**

Standard model no. – XB6

# Cold Resistant Cylinder (-40 to 70 °C)

Symbol

-XB7

Air cylinder which changed the seal material and grease, so that it could be used even at lower temperature down to -40 °C.

#### **Applicable Series**

Description	Model	Action	Note
Chandoud trus	CG1	Double acting, Single rod	Except with air cushion and auto switch, rod end bracket, pivot bracket.
Standard type	CG1W	Double acting, Double rod	Cylinders with rubber bumper have no bumper.  Except with rod boot and with air cushion.
Direct mount type	CG1R	Double acting, Single rod	Except with air cushion and with auto switch. Cylinders with rubber bumper have no bumper.

- Note 1) Operate without lubrication from a pneumatic system lubricator.
- Note 2) Use dry air which is suitable for heatless air dryer etc. not to cause the moisture to be frozen.
- Note 3) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.
- Note 4) Mounting auto switch is impossible.
- Note 5) Without a bumper.

Piston speed is ranged from 50 to 500 mm/s.

#### **Specifications**

Ambient temperature range	–40 °C to 70 °C	
Seal material	Low nitrile rubber	
Grease	Cold resistant grease	
Auto switch	Not mountable	
Dimensions	Same as standard type	
Additional specifications	Same as standard type	

### **⚠** Warning

#### **Precautions**

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

#### **How to Order**

Standard model no. – XB7

# 3 Low Speed Cylinder (10 to 50 mm/s)

**Symbol** 

-XB9

Even if driving at lower speeds 10 to 50 mm/s, there would be no stick-slip phenomenon and it can run smoothly.

#### **Applicable Series**

Description	Model	Action	Note
Standard type	CG1	Double acting, Single rod	Except with rod boot and with air cushion
Direct mount type	CG1R	Double acting, Single rod	Except with air cushion

Note) Operate without lubrication from a pneumatic system lubricator.

#### **How to Order**

Standard model no.	– XB9
Low speed cyli	nder

#### **Specifications**

Piston speed	10 to 50 mm/s	
Dimensions	Same as standard type	
Additional specifications	Same as standard type	

# **⚠Warning** Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

# 4 Low Speed Cylinder (5 to 50 mm/s)

Symbol -XB13

Even if driving at lower speeds 5 to 50 mm/s, there would be no stick-slip phenomenon and it can run smoothly.

#### **Applicable Series**

Description Model		Action	Note	
Standard type	CG1	Double acting, Single rod	Except with rod boot and with air cushion	
Direct mount type	CG1R	Double acting, Single rod	Except with air cushion	

Note 1) Operate without lubrication from a pneumatic system lubricator. Note 2) For speed adjustment, use speed controllers for controlling at lower speeds. (Series AS-FM/AS-M)

# Specifications Piston speed

Piston speed	5 to 50 mm/s	
Dimensions	Same as standard type	
Additional specifications	Same as standard type	

# **⚠ Warning** Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

#### **How to Order**

Standard model no. – XB13

# 5 With Heavy Duty Scraper

Symbol -XC4

It is suitable for using cylinders under the environment, where there are much dusts in a surrounding area by using a heavy duty scraper on the wiper ring, or using cylinders under earth and sand exposed to the die-casted equipment, construction machinery, or industrial vehicles.

#### **Applicable Series**

Description	Model	Action	Note
Standard type	CG1	Double acting, Single rod	ø 32 to ø 63 only

#### **How to Order**

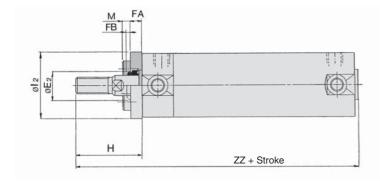

#### Specifications: Same as standard type

#### **⚠** Caution

Do not replace heavy duty scrapers.

• Since heavy duty scrapers are press-fit, they must be replaced together with the scraper bracket.

#### **How to Order**

### **⚠Warning**

Adjustable stroke cylinder/Adjustable extension type

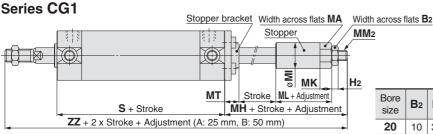

- Precautions

  1. When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take
- preventive measures as necessary, such as installing a protective cover.

  2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

# 8 Adjustable Stroke Cylinder/Adjustable Retraction Type

Symbol -XC9

The retracting stroke of the cylinder can be adjusted by the adjustment bolt.

**Applicable Series** 

Description	Model	Action	Note					
Standard type	CG1	Double acting, Single rod	Except head flange and clevis types					
Non-rotating rod type	CG1K	Double acting, Single rod	Except head flange and clevis types and with air cushion					
Direct mount type	CG1R	Double acting, Single rod	Except with air cushion					
Direct mount, Non-rotating rod type	CG1KR	Double acting	Except with air cushion*1					

**Specifications** 

Stroke adjustment symbol	А	В		
Stroke adjustment range [mm]	0 to 25	0 to 50		
Additional specifications	Same as standard type			

\*1 The shape is the same as the existing product. Use the existing seal kit.

**How to Order** 

CG1 Mounting style Type Bore size **Stroke** Stroke adjustment symbol Rod end bracket Except head flange and clevis types

CG1KR Mounting style

**Type** Bore size

Stroke adjustment symbol **Stroke** XC9

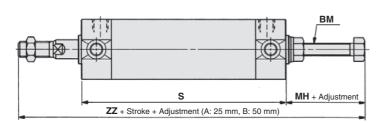

Adjustable stroke cylinder/Adjustable retraction type

#### **Precautions**

- 1. When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly out or air could be discharged, which could injure personnel or damage the peripheral equipment.
- 2. Adjust the stroke when the cylinder is not pressurised. If it is adjusted in the pressurised state, the seal of the adjustment section could become deformed, leading to air leakage.

#### Dimensions (Dimensions other than below are the same as standard type.)

						[mm]	
Dava sina	DM	٥	Rubber	bumper	Air cushion		
Bore size	ВМ	S	MH	ZZ	МН	ZZ

50	M12 x 1.75	102	33	193	37	197	
63	M16 x 2	102	40	200	44	204	

- \* In the case of axial foot type, it is assembled at the time of shipment. On other types, it is placed in the same package, (but not assembled).
- \* Dimensions other than above are the same as those for the CG1 series, long stroke type.

## 9 Dual Stroke Cylinder/Double Rod Type

Symbol -XC10

Two cylinders are constructed as one cylinder in a back-to-back configuration allowing the cylinder stroke to be controlled in three steps.

#### **Applicable Series**

Description	Model	Action	Note
Standard type	CG1	Double acting, Single rod	Except rod end bracket, pivot bracket
Non-rotating rod type	CG1K	Double acting, Single rod	Except rod end bracket, pivot bracket

#### **How to Order**

Dual stroke cylinder/Double rod type

#### **Function**

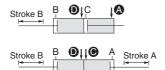

DIG

Stroke A

When air pressure is supplied to ports (a) and (b), both strokes A and B retract.

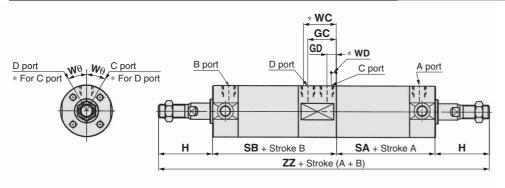

When air pressure is supplied to ports **B** and **O**, A out strokes.

When air pressure is supplied to ports **(A)** and **(D)**, B out strokes.

When air pressure is supplied to ports **②** and **③**, both strokes A and B out strokes.

\* ( ): With air cushion

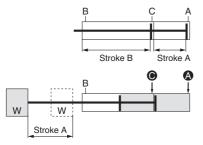

Note) When the stroke A is a long stroke (ø 20: 201 mm or more, ø 25 to ø 63: 301 mm or more)

#### Functional description of dual stroke cylinder

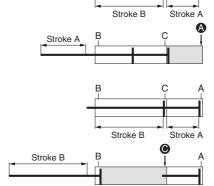

- Initial state
   (0 stroke position)
- 2) 1st stage (Stroke A operation) When the air pressure is supplied from the port, the rod operates the stroke A.
- 3) 2nd stage (Stroke B-A operation) Following the 1st stage, when the air pressure is supplied from tle port, the rod operates the stroke B-A.
- 4) Cylinder retraction When the air pressure is supplied from tl® port, the rod retracts completely.

#### Double output is possible.

- Initial state
   (0 stroke position)
- 2) Double output
  When the air pressure
  is supplied to to and ports at the same time, the double output can be obtained in the stroke A range.

#### Stroke A or stroke B operation can be made individually.

#### Stroke A operation

- Initial state
   (0 stroke position)
- 2) Operation
  When the air pressure
  is supplied from
  the port, the rod
  operates the stroke A.

#### Stroke B operation

- Initial state
   (0 stroke position)
- 2) Operation
  When the air pressure
  is supplied from
  the port, the rod
  operates the stroke B.

# **⚠** Caution Precautions

- 1. Do not supply air until the cylinder is fixed with the attached bolt.
- If air is supplied without securing the cylinder, the cylinder could lurch, posing the risk of bodily injury or damage to the peripheral equipment.

11 Tandem Cylinder

Symbol

-XC12

This is a cylinder produced with two air cylinders in line allowing double the output force.

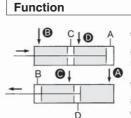

#### **Applicable Series**

Description Model		Action	Note		
Standard type	CG1	Double acting, Single rod	Except with air cushion		
Non-rotating rod type	CG1K	Double acting, Single rod	Except with air cushion		

#### **How to Order**

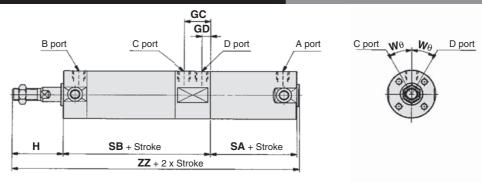

#### Specifications: Same as standard type

When air pressure is supplied to ports **B** and **1**, the output force is doubled in the retract stroke.

When air pressure is supplied to ports (A) and (), the output force is doubled in the out stroke.

#### Dimensions (Dimensions other than below are the same as standard type.)

#### **Minimum Stroke for Auto Switch Mounting**

			[mm]		
	Number of auto switches				
Auto switch model	1	2 Same surface	n (n: No. of auto switches) Same surface		
D-M9□/M9□V D-F7□V D-J79C	5	5	10 + 10 (n - 2) (n = 4, 6 ···) <sup>Note)</sup>		
D-M9□WV D-M9□AV D-F7□WV D-F7BAV D-A79W	10	15	10 + 15 (n - 2) (n = 4, 6 ···) <sup>Note)</sup>		
D-M9□W D-M9□A	10	15	15 + 15 (n – 2) (n = 4, 6 ···) <sup>Note)</sup>		
D-F7□ D-J79	5	5	15 + 15 (n - 2) (n = 4, 6 ···) <sup>Note)</sup>		
D-F7□W/J79W D-F7BA D-F79F/F7NT	10	15	15 + 20 (n - 2) (n = 4, 6 ···) <sup>Note)</sup>		
D-A7□/A80 D-A73C/A80C	5	10	15 + 10 (n - 2) (n = 4, 6 ···) Note)		
D-A7□H D-A80H	5	10	15 + 15 (n - 2) (n = 4, 6 ···) <sup>Note)</sup>		

Note) When "n" is an odd number, an even number that is one larger than this odd number is used for the calculation. However, the minimum even number is 4. So, 4 is used for the calculation when "n" is 1 to 3.

#### **Auto Switch Mounting Brackets/Part No.**

	5	
Auto switch model	Bore size [mm]	
Auto switch model	ø <b>20</b> to ø <b>100</b>	
D-M9□/M9□V D-M9□W/M9□WV	BQ2-012	
D-M9□A/M9□AV	BQ2-012S	

Note 1) When ordering the auto switches other than D-M9□□□ and D-F7BA(V) mentioned on the above, order auto switch mounting brackets BQ-1 separately.

When adding the auto switch D-F7BA(V), order a stainless steel screw set BBA2 separately.

#### **Operating Range**

								[mm]
Auto switch model				Bore	size			
Auto switch model	20	25	32	40	50	63	80	100
D-M9□/M9□V D-M9□W/M9□WV D-M9□A/M9□AV	4	4	5	4	5.5	6.5	7.5	7
D-F7□/F79F/F7□V D-J79/J79C D-F7□W/J79W/F7□WV D-F7BA/F7BAV D-F7NT	4.5	4	4.5	5	5	6	6	6
D-A7□/A80 D-A7□H/A80H D-A73C/A80C	9	9	10	11	11	13.5	13	13.5
D-A79W	11	11	13	14	14	16.5	16	16.5

<sup>\*</sup> Since the operating range is provided as a guideline including hysteresis, it cannot be guaranteed. (Assuming approximately ±30 % dispersion.) It may vary substantially depending on an ambient environment.

Note 2) When adding D-M9□A(V), order a stainless steel screw set BBA2 together with BQ2-012S separately.

# 13 Head Cover Axial Port

Symbol -XC20

Head side port position is changed to the axial direction. (Standard head side port is plugged with hexagon socket head screw.)

**Applicable Series** 

Description	Model	Action	Note
	CG1	Double acting, Single rod	Except with air cushion
Standard type	CG1	Single acting (Spring return/extend)	
Non-rotating rod type	CG1K	Double acting, Single rod	Except with air cushion
Direct mount type	CG1R	Double acting, Single rod	Except with air cushion
Direct mount, Non-rotating rod type	CG1KR	Double acting, Single rod	Except with air cushion*1

\*1 The shape is the same as the existing product. Use the existing seal kit.

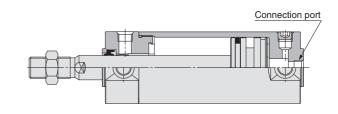

#### **How to Order**

#### Specifications: Same as standard type

\* Be sure to use the speed controller since head side port has no throttle.

#### Construction

Bore size [mm]	Port size
20, 25, 32, 40	Rc1/8
50, 63	Rc1/4

\* Same dimensions as standard type except port size.

# 14 Fluororubber Seal

Symbol -XC22

**Applicable Series** 

Description	Model	Action	Note	
Ctondard tune	CG1 Double Single		Cylinders with rubber bumper have no bumper.	
Standard type	CG1W	Double acting, Double rod	Cylinders with rubber bumper have no bumper.	
Direct mount type	CG1R	Double acting, Single rod	Cylinders with rubber bumper have no bumper.	

#### **How to Order**

**Specifications** 

Seal material	Fluororubber			
Ambient temperature range	With auto switch $^{Note\ 1)}$ : $-10\ ^{\circ}\text{C}$ to $60\ ^{\circ}\text{C}$ (No freezing) Without auto switch : $-10\ ^{\circ}\text{C}$ to $70\ ^{\circ}\text{C}$			
Specifications other than above and external dimensions	Same as standard type			

- Note 1) Please contact SMC, as the type of chemical and the operating temperature may not allow the use of this product.
- Note 2) Cylinders with auto switches can also be produced; however, auto switch related parts (auto switch units, mounting brackets, built-in magnets) are the same as standard products.

Before using these, please contact SMC regarding their suitability for the operating environment.

## 15 Double Clevis and Double Knuckle Joint Pins Made of Stainless Steel

Symbol -XC27

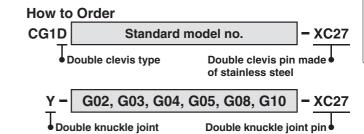

To prevent the oscillating portion of the double clevis or the double knuckle joint from rusting, the material of the pin and the retaining ring has been changed to stainless steel.

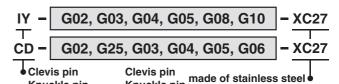

**Applicable Series** 

Description	Model	Action	Note			
Standard type	CG1	Double acting, Single rod	Except with rod end bracket

50	Up to 300	301 to 1500	7	62	30	58	8	154 (166)	122 (134)	
63	Up to 300	301 to 1500	7	62	30	72	10	154 (166)	122 (134)	

Note) (): Long stroke

- $\ast$  Other dimensions are the same as double acting, single rod, standard type.
- \* On the axial foot and the rod flange types, the mounting bracket is wedged and bolted between the cylinder and the scraper at the time of shipment. On other types, it is placed in the same package, (but not assembled).
- \* The long stroke shows the maximum manufacturable stroke. For details about maximum stroke that can be used for each mounting bracket, contact SMC.

# 18 Larger Throttle Diameter of Connection Port

Symbol XC37

This is a cylinder with a piping port larger than the standard type.

**Applicable Series** 

Description	n Model Action		Note	
Standard type	CG1	Double acting, Single rod	* Except ø 80, ø 100	
Double rod type	CG1W	Double acting, Double rod	Except with air cushion * Except ø 80, ø 100	

#### **How to Order**

Standard model no. – XC37

Larger throttle diameter of connection port

Specifications: Same as standard type

Dimensions (Throttle diameter of connection port) Dimensions other than below are the same as standard type.

			[mm]			
Bore size	With rubber bumper	With air cushion	Standard type			
20	5	3	(2.1)			
25	5	3.5	(2.5)			
32	(	(3.3)				
40	7	7				
50	9	(4.5)				
63	9	(5.7)				

<sup>\*</sup> Use external stopper etc. not to be damaged with cylinder cover directly if exceeding the range of kinetic energy absorption.

Direct Mount

## 19 Built-in Shock Absorber in Head Cover Side

A type of the CG1 series air cylinder in which a special shock absorber is enclosed in the head portion so that its ability to absorb energy during the retraction of the cylinder is considerably greater than the conventional air cushion.

**Applicable Series** 

Description	Model Action		Note
Standard type		Double acting, Single rod	

#### **Specifications**

Piston speed	50 to 1000 mm/s
Additional specifications	Same as standard type

\* On the axial foot and head flange types, the bracket is mounted at the time of shipment. Others are shipped together, (but not assembled).

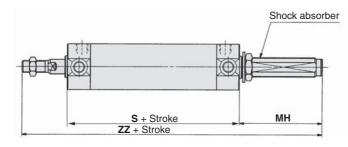

#### **How to Order**

Standard model no. – XC42

Built-in shock absorber in head cover side

#### **Dimensions** (Dimensions other than below are the same as the CG1 long stroke type.)

The shock absorber service life is different from that of the CG1 cylinder. Refer to the RB series Specific Product Precautions for the replacement period.

					[mm]
Bore size	Stroke range	Shock absorber	S	MH	ZZ
20	10 to 350	RBAC0806	77	23.5	135.5
25	10 to 400	RBAC1007	77	31	148
32	15 to 450	RBAC1412	79	55	174
40	15 to 800	RBAC2015	87	62.5	199.5
50	15 to 1200	RBAC2015	102	55.5	215.5
63	25 to 1200	RBAC2725	102	92.5	252.5

\* Shock absorbers are consumables.

The specifications for shock absorbers are the same as those for the RBC \u2214 \u2214 \u2214 but use the RBAC \u2214 \u2214 when an external pressure is applied such as for a built-in cylinder. The maximum absorption energy may decrease depending on the operating conditions.

# Symbol -XC85

## 20 Grease for Food Processing Equipment

Food grade grease (certified by NSF-H1) is used as lubricant.

**Applicable Series** 

Description	Model	Action	Note
Standard type	CG1 Double acting, Single rod		
Standard type	CG1W	Double acting, Double rod	
Direct mount type	CG1R	Double acting, Single rod	

#### **How to Order**

Standard model no. – XC85

Grease for food processing equipment

#### **⚠** Warning

#### **Precautions**

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

#### Not installable zone

Food zone — An environment where the raw materials and materials of food products, semi-finished food products and food products that make direct or indirect contact in a normal processing process.

Splash zone — An area where a portion of food products accidentally splash and stick under the intended operating conditions. An environment where food products that enter this area do not return to the food product contact portion again, and are not used as food products.

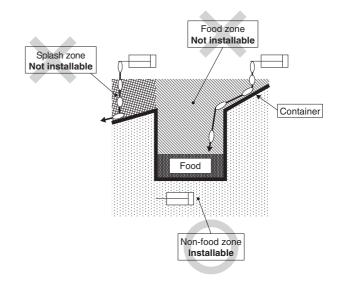

#### Installable zone

Non-food zone ......Other environments including the food splash zone, except for the food contact portions.

- Note 1) Avoid using this product in the food zone. (Refer to the figure on the right.)
- Note 2) When the product is used in an area of liquid splash, or a water resistant function is required for the product, please consult SMC.
- Note 3) Operate without lubrication from a pneumatic system lubricator.
- Note 4) Use the following grease pack for the maintenance work. GR-H-010 (Grease: 10 g)
- Note 5) Please contact SMC for details about the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

#### **Specifications**

Ambient temperature range	–10 °C to 70 °C		
Seal material	Nitrile rubber		
Grease	Grease for food  Mountable  Same as standard type  Same as standard type		
Auto switch			
Dimensions			
Additional specifications			

Symbol

-X446

# 21 PTFE Grease Applicable Series

7 tppiioasio o	000		
Description	Model	Action	Note
Standard type	CG1	Double acting, Single rod	Except with air cushion

#### **How to Order**

#### Specifications: Same as standard type

#### Dimensions: Same as standard type

 When grease is necessary for maintenance, grease pack is available, please order it separately.
 GR-F-005 (Grease: 5 g)

### **⚠ Safety Instructions**

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

Caution indicates a hazard with a low level of risk

which, if not avoided, could result in minor or moderate injury.

------

injury

**Warning:** Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

\*1) ISO 4414: Pneumatic fluid power – General rules relating to systems. ISO 4413: Hydraulic fluid power – General rules relating to systems. IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements) ISO 10218-1: Manipulating industrial robots - Safety.

#### **⚠** Warning

 The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- Do not service or attempt to remove product and machinery/equipment until safety is confirmed.
  - The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
  - When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
  - Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
  - Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
  - 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
- An application which could have negative effects on people, property, or animals requiring special safety analysis.
- 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

#### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### **Limited warranty and Disclaimer**

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, wichever is first.\*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.
  - \*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### **Compliance Requirements**

- The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

#### **⚠** Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch

#### **⚠** Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Be sure to read "Handling Precautions for SMC Products" (M-E03-3) before using.
