

Environmental Policy Statement

Our operations do not involve any manufacturing processes or by products. We do however, in common with all responsible companies, recognise the importance of protecting the environment.

To this end our business is conducted as follows.

1. To put environmental sensitivity at the forefront of business decisions and operations where ever possible.
2. We recycle the packing material in which the products was supplied wherever possible.
3. We use second life or recycled packaging materials.
4. Our water, gas, electricity consumption are regularly monitored. We aim to reduce consumption year on year compare to previous year usage.
5. Each of our locations have contracts with their local authorities for the disposal of waste materials.
6. To reduce the levels of waste sent to landfill or incineration, through application of recycling schemes in the office and warehouse environments.
7. To schedule all transportation in a manner which will minimize toxic emissions, by using delivery/ return haulage.
8. None of our locations use, handle or dispose of any hazardous chemicals other than domestic quantities of cleaning materials.
9. We continuously monitor our supplier environmental stance in an effort to improve environmental awareness in the supply chain.
10. Actively promote recycling both internally and amongst our customers.
