

INDUSTRIAL AUTOMATION SERVICES CAN ADDRESS A WIDE RANGE OF CHALLENGES FACED BY BUSINESSES

Optimisation of Processes

Services can analyse existing processes and identify areas for improvement.

Technology Upgrades and Integration

Automation services can help in upgrading existing systems to leverage the latest technologies and integrate them seamlessly with other systems for improved functionality and interoperability.

Training and Skill Development

Training and skill development are essential for maximizing the potential of automation systems. Services can provide training programs to educate employees on system operation, maintenance procedures, and troubleshooting techniques, empowering them to utilize automation technology effectively.

Cybersecurity

As automation systems become more interconnected and digitized, cybersecurity threats pose significant challenges. Services can implement robust cybersecurity measures, such as firewalls, encryption, and access controls, to safeguard critical infrastructure and data from cyber-attacks.

Product Circularity

With the worlds resources diminishing keeping automation systems working for as long as possible, minimising waste, saving energy and maximising their value can be supported through services including repairs, recycling, reusing, and refurbishing.

By addressing these challenges effectively, industrial automation services from Routeco can play a crucial role in enhancing competitiveness, increasing efficiency, and driving sustainable growth for businesses.

ROUTEICO'S SERVICES OFFER

Routeco
A Sonepar Company

WHY CHOOSE ROUTECO?

Expertise

Routeco employs highly skilled engineers and technicians who possess deep knowledge and experience in industrial automation and control systems.

Range of Services

Routeco offers a comprehensive range of services including technical support, maintenance, repairs, upgrades, and training.

Authorised

Routeco holds authorised distributor agreements for many leading brands in the industrial automation sector.

Reliability and Trust

Routeco has built a reputation for reliability and trustworthiness over time by consistently delivering high-quality services and support to clients.

Customised Solutions

Routeco works closely with clients to understand their specific requirements and challenges. This allows a tailored solution that address the unique needs of each client to be offered, rather than providing generic fixes.

Choosing Routeco for service needs can provide peace of mind, knowing that your industrial automation systems are in capable hands, and any issues will be addressed promptly and effectively.

SERVICES

Services can be applied to various areas within a manufacturing business to improve efficiency, productivity, and overall performance. Key areas where services can be applied include:

Equipment Maintenance and Repair

Services to focus on preventive maintenance, regular inspections, and timely repairs of manufacturing equipment to minimize downtime and ensure optimal operational efficiency.

Process Optimisation

Analyse network processes to identify bottlenecks, inefficiencies, and opportunities for improvement. This may involve prioritising of processes to ensure machine uptime.

Supply Chain Management

Optimising supply chain processes, such as inventory management, procurement, and logistics, to ensure timely delivery of components while minimising costs and disruptions.

Energy Management

Focus on energy efficiency initiatives, such as implementing energy-saving technologies, improving equipment usage, and monitoring energy consumption, to reduce operating costs and environmental impact.

SERVICES

Training and Skill Development

Providing training programs to equip employees with the necessary skills and knowledge to operate machinery safely, troubleshoot issues, and adhere to best practices, enhancing overall workforce competence and productivity.

Product Lifecycle Management

Supporting end of life product and software requirements to ensure legacy equipment stays running.

Customer Support and After-sales Service

Services including customer support functions such as technical assistance, warranty services, and product repair or replacement, fostering customer satisfaction, loyalty, and repeat business.

Engineering Value

Unlock the benefits of saving time and hidden costs through subcontracting your enclosure modifications requirements.

By applying services in these areas, manufacturing businesses can optimize their operations, enhance competitiveness, and adapt to changing market demands effectively.
