

Routeco statement regards Covid-19 virus

release: 22.10.2020

Dear Customer,

As the Coronavirus (COVID-19) remains a global pandemic challenge, Routeco continue to monitor the developing situation throughout the UK and European site local areas and the potential impact to supply chain activities. This situation is of the highest concern to our business and the Management team continue to plan for all eventualities should the situation worsen.

Routeco Limited is strongly committed to the safety of our employees and those of our suppliers & customers while we also strive to anticipate and mitigate potential risk to our customers. We are in continuous communication with our core suppliers regarding the potential impact to the supply of goods. Routeco have a very limited supply of goods that are manufactured in high risk areas. These suppliers generally have a global manufacturing footprint. However, as the situation around the world changes there may on occasions be an impact on supply chain lead times, either due to the manufacturing or distribution network.

Routeco have the majority of staff working from home with the essential workers such as Logistics staff continuing to operate within the CDC and the Service Centres. There remain minimal teams based in the Service Centres sales operations.

This situation remains highly dynamic. We will monitor and react to the advice of local governments and WHO and will continue to keep you updated with any changes or new development.

Please feel free to contact your local Service Centre or account manager if you have any questions, and to cascade this email to the relevant persons in your organization.

Darren Lack
Group Supply Chain Director
