Rockwell Automation Tech Workshops

East Kilbride, 10th May 2017

Workbench with Rockwell Automations PowerFlex 525 Variable Speed Drives and the Micro 800 Family PLCs. Plus programmable safety with the CR30.

The next generation of compact drives and micro PLCs from Rockwell Automation is here. With Connected Components Workbench software we set a new global standard for convenience and ease of use, whilst providing just enough control capability to match your application.

The Technical Workshop provides you with the opportunity to develop an understanding of Rockwell Automation's offering for small OEMs and control panel builders.

This is your opportunity to discuss any aspect of automation face to face with our automation specialists.
