

SUMMARY**Learning+ Content**

e-Learning courses are self-paced and self-directed so you can learn when and where it is convenient for you.

Virtual Classroom blended hybrid course sessions add modularized virtual lectures, lab experience demonstrations, simulations and videos. Available office hours for group coaching, enrolment via on-line calendar to enhance e-Learning. Our e-Learning incorporates a variety of fundamental and product specific topics to help you build expertise on automation and control systems. Each learning module contain activities, software simulations, and demonstration videos to help reinforce learning concepts.

The modules can be taken on any tablet or PC using Chrome, Safari, IE, Edge, or Firefox, and all content is narrated, with a viewable transcript.

Initial global launch consists of currently 20+ courses and supporting hybrid virtual classroom courses across seven technologies, with more to follow throughout 2021/22. Please check specific course availability. Language support is provided as stated within the Learning+ experience.

VALIDATED LEARNING

Each lesson has a knowledge assessment, which you are required to pass.

Upon successful completion of the course, a learner will be awarded a certificate of completion.
